Cambridge International a Level  
Information Technology Student's  
Book Simon and Schuster  
The volume focuses on body part  
terms as the vehicle of embodied  
cognition and conceptualization.  
It explores the relationship  
between universal embodiment,  
language-specific cultural models  
and linguistic usage practices. The  
chapters of the volume add to the  
previous research in a novel way.  
The presentation of original data  
from previously undescribed  
languages spoken by small  
communities in Africa and South  
America allows to discover  
unknown aspects of embodiment  
and to propose new  
interpretations. Well-known  
languages are analyzed from a new  
perspective relying on the benefits  
of linguistic corpora. Contrastive  
and theoretically oriented studies  
help to pinpoint similarities and  
differences among languages, as  
well as tendencies in  
conceptualization patterns and  
semantic development of the lexis  
of body part terms. The volume  
contributes to the field of  
linguistics, but also to cognitive  
science, anthropology and cultural

studies.

Merezhkovsky's bold  
claim that "all Russian  
literature is, to a  
certain degree, a  
struggle with the  
temptation of  
demonism" is  
undoubtedly justified.

And yet, despite its  
evident centrality to  
Russian culture, the  
unique and fascinating

---

phenomenon of Russian literary demonism has so far received little critical attention. This substantial collection fills the gap. A comprehensive analytical introduction by the editor is followed by a series of fourteen essays, written by eminent scholars in their fields. The first part explores the main shaping contexts of literary demonism: the Russian Orthodox and folk tradition, the demonization of historical figures, and views of art as intrinsically demonic. The second part traces the development of a literary tradition of demonism in the works of authors ranging from Pushkin and

Lermontov, Gogol and Dostoevsky, through to the poets and prose writers of modernism (including Blok, Akhmatova, Bely, Sologub, Rozanov, Zamiatin), and through to the end of the 20th century.

The winner of the 2016 Pulitzer Prize for Fiction, as well as seven other awards, *The Sympathizer* is the breakthrough novel of the year. With the pace and

suspense of a thriller and prose that has been compared to Graham Greene and Saul Bellow, *The Sympathizer* is a sweeping epic of love and betrayal. The narrator, a communist double agent, is a "man of two minds," a half-French, half-Vietnamese army captain who arranges to come to America after the Fall of Saigon, and while building a new life with other Vietnamese refugees in Los Angeles is secretly reporting back to his communist superiors in Vietnam. *The Sympathizer* is a blistering exploration of identity and America, a gripping espionage novel, and a powerful story of love and friendship.

This forum of current discussions of ethics and aesthetics addresses a cross-section of disciplines including literary theory, philosophy, women's studies, postcolonial theory, art history, Holocaust studies, theology, and others. Contributors, ranging

from philosophers and literary critics to practicing artists and art curators, answer such questions as: In the age of the collapse of metaphysics, what is the relation between philosophical reflection and art? If we question the privilege accorded to the aesthetic, can ethics alone offer a solution to the crisis of representation? Is it possible and ethically viable to represent the other in speech and image? What happens at the conjunction of aesthetics and politics? Can one speak of aesthetic configurations of the space of community? Are the concepts of ethics and aesthetics gendered and repressive of sexual difference? Considering the many works that

---

consider either ethics or aesthetics almost exclusively within the confines of particular disciplines, this collection crosses the boundaries and continues the debate outside the rigid parameters of specialized discourses.

The use of MATLAB is ubiquitous in the scientific and engineering communities today, and justifiably so. Simple programming, rich graphic facilities, built-in functions, and extensive toolboxes offer users the power and flexibility they need to solve the complex analytical problems inherent in modern technologies. The ability to use

MATLAB effectively has become practically a prerequisite to success for engineering professionals. Like its best-selling predecessor, *Electronics and Circuit Analysis Using MATLAB, Second Edition* helps build that proficiency. It provides an easy, practical introduction to MATLAB and clearly demonstrates its use in solving a wide range of electronics and circuit analysis problems. This edition reflects recent MATLAB enhancements, includes new material, and provides even more examples and exercises. Living and Dying with Grace is a book of aphoristic Sufi teachings on how to make one's way in the world—especially on how to bring spiritual insight to the affairs of daily life. Sufism, the mystical branch of Islam, contains a vast body of knowledge concerning the inner development of the complete human being.

Among the greatest of Sufi masters, Hadrat 'Alī (598-661 CE), cousin and son-in-law of the Prophet Muhammad, is regarded as a paragon of compassion and virtue and a master of both exoteric and esoteric knowledge. He was not only a great warrior, statesman, and scholar, but also a devoted husband and father. Success in this life, 'Alī

teaches, is bestowed on those who maintain generosity, intelligence, perseverance, integrity, and calm reflection. As for success in the hereafter, 'Alī says, "God, the Glorified, admits to Paradise anyone, at will, for truthfulness of intention and goodness of innermost thoughts." This book contains four hundred of Hadrat 'Alī's teachings, showing how people can use the everyday realities of their lives to cultivate wisdom and well-being, both temporal and eternal, offering a path to living and dying with grace.

"Significant...The book is both instructive and surprisingly moving." —The New York

Times Ray Dalio, one of the world's most successful

investors and entrepreneurs, shares the unconventional principles that he's

developed, refined, and used over the past forty years to

create unique results in both life and business—and which

any person or organization can adopt to help achieve

their goals. In 1975, Ray Dalio

founded an investment firm, Bridgewater Associates, out

of his two-bedroom apartment in New York City. Forty years

later, Bridgewater has made more money for its clients

than any other hedge fund in history and grown into the fifth

most important private company in the United States,

according to Fortune magazine. Dalio himself has

been named to Time magazine's list of the 100

most influential people in the world. Along the way, Dalio

---

discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency," include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach

challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating "baseball cards" for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, *Principles* also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (*CIO* magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.

Dostoevsky and Romantic Realism is Donald Fanger's groundbreaking study of the art of Dostoevsky and the literary and historical context in which it was created.

Through detailed analyses of the work of Balzac, Dickens, and Gogol, Fanger identifies romantic realism, the transformative fusion of two generic categories, as a powerful imaginary response to the great modern city. This fusion reaches its aesthetic and metaphysical climax in Dostoevsky, whose vision culminating in *Crime and Punishment* is seen by Fanger as the final synthesis of romantic realism.
