In the U.S., the response to an incident is regulated under many statutes and many government agencies. It is important for responders to at least understand the basis of these regulations because they dictate everything, from how they manage a spill to the disposal of the spilt material. These regulations stipulate who should be notified and when it is not necessary, as well as what resources or assistance are available to local and state entities if the

containment of a spill is beyond their capabilities. Tactical Skull Session William Andrew

The Tactical Skull Session textbook and computer simulations are designed for the emergency

responder who would like to take a challenge utilizing their own department's strategies and tactics. This stimulation was created to assist the young responder, while at the same time challenge the seasoned. This system is based upon the idea of using a contextual event to discuss HazMat tactics, strategies, decontamination procedures, and air monitoring usage. It is also used to create a platform by which the seasoned officer can now mentor up-and-coming HazMat officers. The goal is to provide users the tools necessary to create their own tactical toolbox through experience learning.??
