Hazardous Materials Awareness and Operations Student Workbook Jones & Bartlett Publishers

The purpose of this course is to train people to provide defensive security measures in a potentially contaminated environment. By end of the course the trainee will have an operations level understanding of how to respond to an incident involving patients arriving at the facility that have been exposed to Chemical Biological and Radiological Materials. The modules that follow are designed to increase the depth of knowledge of responders who may be confronted with the challenges created if a terrorist incident were to involve the deployment of Weapons of Mass Destruction (WMD). This is a Pageburst digital textbook; Before September 11, 2001, hazardous materials (Hazmat) in general, and Weapons of Mass Destruction (WMD) in particular, were specialty fields. Today, they are a vital part of our health and safety. Federal and local protocols regarding WMD preparedness are changing daily. Additionally, JCAHO has modified its standards to include compliance requirements for the health care industry's response to WMDs, for those facilities that seek accreditation. This text was developed in response to the growing need for education about WMD. Medical Response to Weapons of Mass Destruction quickly, yet thoroughly, brings health care workers and emergency responders up to speed and prepares them to respond to the release of weapons of mass destruction, such as biological, nuclear, incendiary, chemical, and explosive agents. Contains detailed information on WMD response including types of locations that may become targets for criminal or terrorist activity, procedures, equipment, and safety precautions for evidence preservation. Highlights signs, symptoms, and treatment protocols for common agents that may be used. Lists specific actions necessary when an incident is suspected to involve criminal or terrorist activities, necessary notification procedures, personal protective equipment needs, appropriate detection devices, mass casualty decontamination, and scene management procedures. Meets the new federal and state laws regarding Hazmat response. Helps hospitals comply with JCAHO standards for accreditation Covers OSHA (29 CFR 1910-120) and EPA (40 CFR 311) standards to the Operations level Covers NFPA 473 completely (to Level II) [Hazardous Materials](#) Jones & Bartlett Publishers Hazardous Materials Awareness and Operations meets and exceeds the requirements for Fire Fighter I and II certification and satisfies the core competencies for operations level responders including the eight mission-specific responsibilities for first responders within the 2008 Edition of

NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. Additionally, the material presented also exceeds the hazardous materials response requirements of the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA). A Complete Training Solution for Hazardous Materials Technicians and Incident Commanders! In 1982, the authors Mike Hildebrand and Greg Noll, along with Jimmy Yvorra, first introduced the concept of the Eight-Step Process© for managing hazardous materials incidents when their highly regarded manual, Hazardous Materials: Managing the Incident was published. Now in its Fourth Edition, this text is widely used by fire fighters, hazmat teams, bomb squads, industrial emergency response teams, and other emergency responders who may manage unplanned hazardous materials incidents. As a result of changing government regulations and consensus standards, as well as the need for terrorism response training, Mr. Noll and Mr. Hildebrand have modified and refined their process of managing hazmat incidents and added enhanced content, tips, case studies, and detailed charts and tables. The Fourth Edition contains comprehensive content covering: * Hazard

assessment and risk evaluation *

Identifying the problem and implementing the response plan * Hazardous materials properties and effects * Identifying and coordinating resources * Decontamination procedures * The Eight-Step Process© * Personal protective equipment selection * Procedures for terminating the incident The Fourth Edition's dynamic features include: * Knowledge and Skills Objectives correlated to the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents* ProBoard Assessment Methodology Matrices for the Hazardous Materials Technician and Hazardous Materials Incident Commander levels * Correlation matrix to the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) Bachelor's (Non- Core) Managerial Issues in Hazardous Materials Course Objectives * Realistic, detailed case studies * Practical, step-by-step skill drills * Important hazardous materials technician and safety tips
