years since  
open data first  
broke onto the  
global stage.  
Over the past  
decade,

thousands of  
programmes and  
projects around  
the world have  
worked to open  
data and use it  
to address a  
myriad of social  
and economic  
challenges.  
Meanwhile,  
issues related to  
data rights and  
privacy have  
moved to the  
centre of public  
and political

discourse. As the  
open data  
movement  
enters a new  
phase in its  
evolution,  
shifting to target  
real-world  
problems and  
embed open data  
thinking into  
other existing or  
emerging  
communities of  
practice, big  
questions still  
remain. How will

---

open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will

shape the future of open data in the years to come.
