I'll Sleep When I'm Dead Harper Collins
In this compelling, cutting-edge book, two generations of science writers explore the exciting science of

"body maps" in the brain-and how startling new discoveries about the mind-body connection can change and improve our lives. Why do you still feel fat after losing weight? What makes video games so addictive? How can "practicing" your favorite sport in your imagination

improve your game? The answers can be found in body maps. Just as road maps represent interconnections across the landscape, your many body maps represent all aspects of your bodily self, inside and out. In concert, they create your physical and emotional awareness and your sense of being a whole, feeling self in a larger social world. Moreover, your body maps are profoundly elastic. Your self doesn't begin and end with your physical body but extends into

the space around you. This space morphs every time you put on or take off clothes, ride a bike, or wield a tool. When you drive a car, your personal body space grows to envelop it. When you play a video game, your body maps automatically track and emulate the actions of your character onscreen. When you watch a scary movie, your body maps put dread in your stomach and send chills down your spine. If your body maps fall out of sync, you may have an out-of-body experience or see auras around other

people. The Body Has a Mind of Its Own explains how you can tap into the power of body maps to do almost anything better-whether it is playing tennis, strumming a guitar, riding a horse, dancing a waltz, empathizing with a friend, raising children, or coping with stress. The story of body maps goes even further, providing a fresh look at the causes of anorexia, bulimia, obsessive plastic surgery, and the notorious golfer's curse "the yips." It lends insights into culture, language,

music, parenting, emotions, chronic pain, and more. Filled with illustrations, wonderful anecdotes, and even parlor tricks that you can use to reconfigure your body sense, The Body Has a Mind of Its Own will change the way you think-about the way you think. A world at once familiar and unimaginably strange exists all around us, and within us – it is the vast realm of consciousness. In *The Head Trip*, science journalist Jeff Warren explores twelve distinct, natural states of consciousness available to us in a twenty-four-hour day, each state offering its own kind of knowledge and insight – its own adventure. The hypnagogic state, when our minds hover between waking and sleeping, can be a rich source of creativity

and even compassion. Then there's the Watch, an almost magical waking experience in the middle of the night that has been all but lost to electric light and modern sleep patterns. Daydreaming and trance, lucid dreaming, the Zone, and the Pure Conscious Event – from sleep laboratory to remote northern cabin, neurofeedback clinic to Buddhist retreat, Warren visits them all. Along the way, he talks to neuroscientists, chronobiologists, anthropologists, monks, and many others who illuminate his stories with cutting-edge science and age-old wisdom. On this trip, all are welcome and no drugs are required: all you need to pack are a functioning cerebrum and an open mind. Replete with stylish graphics and

brightened by comic panels conceived and drawn by the author, *The Head Trip* is an instant classic, a brilliant and original description of the shifting experience of consciousness that's also a practical guide to enhancing creativity and mental health. This book does not just inform and entertain – it shows how every one of us can expand upon the ways we experience being alive.

Lost Boy Metropolitan Books

This heartbreaking, hilarious, and brutally honest memoir shares the deeply personal life story of a girl next door and her transformation into a household name. For more than forty years, Katie Couric has been an iconic presence in the media world. In her brutally honest, hilarious, heartbreaking memoir, she

reveals what was going on behind the scenes of her sometimes tumultuous personal and professional life - a story she's never shared, until now. Of the medium she loves, the one that made her a household name, she says, "Television can put you in a box; the flat-screen can flatten. On TV, you are larger than life but smaller, too. It is not the whole story, and it is not the whole me. This book is." Beginning in early childhood, Couric was inspired by her journalist father to pursue the career he loved but couldn't afford to stay in. Balancing her vivacious, outgoing personality with her desire to be taken seriously, she overcame every obstacle in her way: insecurity, an eating disorder, being typecast, sexism . . . challenges, and how she dealt with them, setting the

tone for the rest of her career. Couric talks candidly about adjusting to sudden fame after her astonishing rise to co-anchor of the TODAY show, and guides us through the most momentous events and news stories of the era, to which she had a front-row seat: Rodney King, Anita Hill, Columbine, the death of Princess Diana, 9/11, the Iraq War . . . In every instance, she relentlessly pursued the facts, ruffling more than a few feathers along the way. She also recalls in vivid and sometimes lurid detail the intense pressure on female anchors to snag the latest “get”—often sensational tabloid stories like Jon Benet Ramsey, Tonya Harding, and OJ Simpson. Couric’s position as one of the leading lights of her profession was shadowed by the shock and trauma of

losing her husband to stage 4 colon cancer when he was just 42, leaving her a widow and single mom to two daughters, 6 and 2. The death of her sister Emily, just three years later, brought yet more trauma—and an unwavering commitment to cancer awareness and research, one of her proudest accomplishments. Couric is unsparing in the details of her historic move to the anchor chair at the CBS Evening News—a world rife with sexism and misogyny. Her “welcome” was even more hostile at 60 Minutes, an unrepentant boys club that engaged in outright hazing of even the most established women. In the wake of the MeToo movement, Couric shares her clear-eyed reckoning with gender inequality and predatory behavior in the workplace, and downfall of

Matt Lauer—a colleague she had trusted and respected for more than a decade. Couric also talks about the challenge of finding love again, with all the hilarity, false-starts, and drama that search entailed, before finding her midlife Mr. Right. Something she has never discussed publicly—why her second marriage almost didn't happen. If you thought you knew Katie Couric, think again. Going There is the fast-paced, emotional, riveting story of a thoroughly modern woman, whose journey took her from humble origins to superstardom. In these pages, you will find a friend, a confidante, a role model, a survivor whose lessons about life will enrich your own.

Software has become crucial to the very survival of civilization. But badly written, insecure software is hurting people – and costing businesses and individuals billions of dollars every year. This must change. In *Geekonomics*, David Rice shows how we can change it. Rice reveals why the software industry is rewarded for carelessness, and how we can revamp the industry's incentives to get the reliability and security we desperately need and deserve. You'll discover why the software industry still has shockingly little accountability – and what we must do to fix that. Brilliantly written, utterly compelling, and thoroughly

In this powerful and heartbreaking account, former FLDS member Brent Jeffs reveals both the terror and the love he experienced growing up on his prophet's compound—and the harsh exile existence that so many boys face once they have been expelled by the sect. Brent Jeffs is the nephew of Warren Jeffs, the

imprisoned leader of the FLDS. The son of a prominent family in the church, Brent could have grown up to have multiple wives of his own and significant power in the 10,000-strong community. But he knew that behind the group's pious public image—women in chaste dresses carrying babies on their hips—lay a much darker reality. So he walked away, and was the first to file a sexual-abuse lawsuit against his uncle. Now Brent shares his courageous story and that of many other young men who have become “lost boys” when they leave the FLDS, either by choice or by expulsion. Brent experienced firsthand the absolute power that church leaders wield—the kind of power that corrupts and perverts those who will

do anything to maintain it. Once young men no longer belong to the church, they are cast out into a world for which they are utterly unprepared. More often than not, they succumb to the temptations of alcohol and other drugs. Tragically, Brent lost two of his brothers in this struggle, one to suicide, the other to overdose. In this book he shows that lost boys can triumph and that abuse and trauma can be overcome, and he hopes that readers will be inspired to help former FLDS members find their way in the world. When Warren Zevon died in 2003, he left behind a rich catalog of dark, witty rock 'n' roll classics, including "Lawyers, Guns and Money," "Excitable Boy," and the immortal "Werewolves of London." He also left behind a fanatical cult

Narrated by his former wife and longtime co-conspirator, Crystal Zevon, this intimate and unusual oral history draws on interviews with Bruce Springsteen, Stephen King, Bonnie Raitt, and numerous others who fell under Warren's mischievous spell. In *TechGnosis*—a cult classic now updated and reissued with a new afterword—Erik Davis argues that while the realms of the digital and the spiritual may seem worlds apart, esoteric and religious impulses have in fact always permeated (and sometimes inspired) technological communication. Davis uncovers startling connections between such seemingly disparate topics as electricity and alchemy; online roleplaying games and religious and occult practices; virtual reality and gnostic mythology; programming languages and Kabbalah. The final chapters address the apocalyptic dreams that haunt technology, providing

To get the best answer-in business, in life-you have to ask the best possible question. Innovation expert Warren Berger shows that ability is both an art and a science. It may be the most underappreciated tool at our disposal, one we learn to use well in infancy-and then abandon as we grow older. Critical to learning, innovation, success, even to happiness-yet often discouraged in our schools and workplaces-it can unlock new business opportunities and reinvent industries, spark creative insights at many levels, and

provide a transformative new outlook on life. It is the ability to question-and to do so deeply, imaginatively, and “ beautifully. ” In this fascinating exploration of the surprising power of questioning, innovation expert Warren Berger reveals that powerhouse businesses like Google, Nike, and Netflix, as well as hot Silicon Valley startups like Pandora and Airbnb, are fueled by the ability to ask fundamental, game-changing questions. But Berger also shares human stories of people using questioning to solve everyday problems-from “ How can I adapt my career in a time of constant change? ” to “ How can I step back from the daily rush and figure out what really makes me happy? ” By showing how to approach

questioning with an open, curious mind and a willingness to work through a series of “ Why, ” “ What if, ” and “ How ” queries, Berger offers an inspiring framework of how we can all arrive at better solutions, fresh possibilities, and greater success in business and life.

Meditation for Fidgety Skeptics Harper Collins In this searing memoir of survival in the spirit of *Stolen Innocence*, the daughter of Warren Jeffs, the self-proclaimed Prophet of the FLDS Church, takes you deep inside the secretive polygamist Mormon fundamentalist cult run by her family and how she escaped it. Born into the Fundamentalist Church of Jesus Christ of Latter-Day Saints, Rachel Jeffs was raised in a strict patriarchal culture defined by subordinate sister wives and men they must obey. No one in this radical splinter sect of the Mormon

Church was more powerful or terrifying than its leader Warren Jeffs—Rachel's father. Living outside mainstream Mormonism and federal law, Jeffs arranged marriages between under-age girls and middle-aged and elderly members of his congregation. In 2006, he gained international notoriety when the FBI placed him on its Ten Most Wanted List. Though he is serving a life sentence for child sexual assault, Jeffs' iron grip on the church remains firm, and his edicts to his followers increasingly restrictive and bizarre. In *Breaking Free*, Rachel blows the lid off this taciturn community made famous by Jon Krakauer's bestselling *Under the Banner of Heaven* to offer a harrowing look at her life with Warren Jeffs, and the years of physical and emotional abuse she suffered. Sexually assaulted, compelled into an arranged

polygamous marriage, locked away in "houses of hiding" as punishment for perceived transgressions, and physically separated from her children, Rachel, Jeffs' first plural daughter by his second of more than fifty wives, eventually found the courage to leave the church in 2015. But *Breaking Free* is not only her story—Rachel's experiences illuminate those of her family and the countless others who remain trapped in the strange world she left behind. A shocking and mesmerizing memoir of faith, abuse, courage, and freedom, *Breaking Free* is an expose of religious extremism and a beacon of hope for anyone trying to overcome personal obstacles.

From one of America 's

iconic writers, a stunning book of electric honesty and passion that explores an intensely personal yet universal experience: a portrait of a marriage—and a life, in good times and bad—that will speak to anyone who has ever loved a husband or wife or child. Several days before Christmas 2003, John Gregory Dunne and Joan Didion saw their only daughter, Quintana, fall ill with what seemed at first flu, then pneumonia, then complete septic shock. She was put into an induced coma and placed on life support. Days later—the night before New Year 's Eve—the Dunnes were just sitting down to dinner after visiting the hospital when John Gregory Dunne suffered a massive and fatal coronary. In a second, this

close, symbiotic partnership of forty years was over. Four weeks later, their daughter pulled through. Two months after that, arriving at LAX, she collapsed and underwent six hours of brain surgery at UCLA Medical Center to relieve a massive hematoma. This powerful book is Didion ' s attempt to make sense of the “ weeks and then months that cut loose any fixed idea I ever had about death, about illness ... about marriage and children and memory ... about the shallowness of sanity, about life itself.

From the inventor of the PalmPilot comes a new and compelling theory of intelligence, brain function, and the future of intelligent machines Jeff

Hawkins, the man who created the PalmPilot, Treo smart phone, and other handheld devices, has reshaped our relationship to computers. Now he stands ready to revolutionize both neuroscience and computing in one stroke, with a new understanding of intelligence itself. Hawkins develops a powerful theory of how the human brain works, explaining why computers are not intelligent and how, based on this new theory, we can finally build intelligent machines. The brain is not a computer, but a memory system that stores experiences in a way that reflects the true

structure of the world, remembering sequences of events and their nested relationships and making predictions based on those memories. It is this memory-prediction system that forms the basis of intelligence, perception, creativity, and even consciousness. In an engaging style that will captivate audiences from the merely curious to the professional scientist, Hawkins shows how a clear understanding of how the brain works will make it possible for us to build intelligent machines, in silicon, that will exceed our human ability in surprising ways. Written with acclaimed science writer Sandra Blakeslee, *On Intelligence* promises to completely transfigure the possibilities of the technology age. It is a landmark book in its scope and clarity.

Rebecca Musser grew up in fear, concealing her family's polygamous lifestyle from the "dangerous" outside world. Covered head-to-toe in strict, modest clothing, she received a rigorous education at Alta

Academy, the Fundamentalist Church of Jesus Christ of Latter Day Saints' school headed by Warren Jeffs. Always seeking to be an obedient Priesthood girl, in her teens she became the nineteenth wife of her people's prophet: 85-year-old Rulon Jeffs, Warren's father. Finally sickened by the abuse she suffered and saw around her, she pulled off a daring escape and sought to build a new life and family. The church, however, had a way of pulling her back in—and by 2007, Rebecca had no choice but to take the witness stand against the new prophet of the FLDS in order to protect her little sisters and other young girls from being forced to marry at shockingly young ages. The following year, Rebecca and the rest of the world watched as a team of Texas Rangers raided the Yearning for Zion Ranch, a stronghold of the FLDS. Rebecca's subsequent

testimony would reveal the horrific secrets taking place behind closed doors of the temple, sending their leaders to prison for years, and Warren Jeffs for life. **THE WITNESS WORE RED** is a gripping account of one woman's struggle to escape the perverse embrace of religious fanaticism and sexual slavery, and a courageous story of hope and transformation.
