Teaching Aboriginal Studies has been a practical guide for classroom teachers in primary and secondary schools, as well as student teachers, across Australia. Chapters on Aboriginal history and culture, stereotypes and racism, government policies and reconciliation provide essential knowledge for integrating Aboriginal history and culture, issues and perspectives across the curriculum. This second edition of Teaching Aboriginal Studies encompasses developments over the past decade in Aboriginal affairs, Aboriginal education and research. It features a wide range of valuable teaching sources including poetry, images, oral histories, media, and government reports. There are also strategies for teaching Aboriginal Studies in different contexts and the latest research findings. The text is lavishly illustrated with photographs, posters, paintings, prints, ads and cartoons. Teaching Aboriginal Studies is the product of consultation and collaboration across Australia. Remarkable educators and achievers, both Aboriginal and other Australians, tell what teachers need to know and do to help Aboriginal students reach their potential, educate all students about Aboriginal Australia and make this country all that we can be. 'The importance of this book cannot be overestimated. We have been insisting for years that pre-service teachers be required to learn about Aboriginal history, culture and identity, and that it be regarded as integral to qualifying for their education degrees.' Lionel Bamblett, General Manager, Victorian Aboriginal Education Association Inc.

This book explores the ways in which anorexic women use their eating to control their bodies. It argues that the female body in modern Western culture is understood as open and accessible and female appetite as dangerous and voracious. Anorexia attempts to resist both these constructions in the creation of a closed, desireless body. Since anorexic women resist the power of collective ideologies their resistance cannot work - the closed body becomes its own prison.

Brigg lives in a small, grey room in a large, grey city. When he finds a book in the library labelled 'Do Not Read', he cannot resist borrowing it. In it, he comes upon pictures of bright, vibrant objects called flowers. A deceptively simple and haunting story, beautifully and mysteriously illustrated, set in a bleak future metropolis.

Anorexia nervosa may affect as many as five to ten percent of adolescent girls in the United States, and on some college campuses, the estimate is as high as twenty percent. Despite its recent "popularity", however, the disease remains puzzling in its causes and stubbornly resistant to a cure. For, as Fasting Girls demonstrates, anorexia nervosa existed long before our current preoccupation with lean bodies. This landmark, award-winning work offers a solution to the mystery of anorexia nervosa, exploring its historical roots from the fasting saints of the Middle Ages and the curious "fasting girls" of the Victorian era to the weight-obsessed celebrities of our own time. By linking broad cultural forces to individual biomedical and psychological factors, Fasting Girls shows how a society that believes a woman "can never be too rich or too thin" actually recruits certain adolescents to anorexia -- those who regard a thin body as a state of perfection. Combined with other social stresses, such an attitude puts an increasing number of contemporary young women at risk. Highly readable and authoritative, Fasting Girls takes the reader into the private world of sufferers in the past, and also shows today's health professionals and parents why America's young women are so vulnerable to anorexia, and what treatments have proven effective in combating this frequently misunderstood, often deadly, disorder.

It's 1943, and nearly-12-year-old George and his older brother Jack are spending a restless wartime summer in Whitby, Ontario, where their mom is working at a munitions plant while their dad is off fighting the Germans. One afternoon, the boys stumble across Canada's top-secret spy camp-and so begins an exciting and terrifying adventure as George and Jack get caught up in the covert activities of Camp X. Fascinated by Camp X and its secrets, the boys begin to suspect local townspeople of being spies. Is the police chief keeping tabs on people for enemy purposes? Is Jack's boss at the newspaper really amassing information for sinister reasons? Unable to resist the camp's allure, the boys keep going back to find out more details of what's going on-they even meet William Stephenson, the Man Called Intrepid himself. They also attract the attention of a very sinister character, someone who is determined to use George and Jack's knowledge against the Allies, no matter the consequences . . . or the casualties.

There is considerable rhetoric and concern about weight and obesity across an increasing range of national contexts. Alarmist claims about an 'obesity time-bomb' are continually recycled in policy reports, reviews and white papers, each of which begin with the assumption that fatness is fundamentally unhealthy and damaging to national economies. With contributions from the UK, Canada, the USA and Australia, this book offers alternative critical perspectives on this alleged public health crisis which were, in part, developed through an Economic and Social Research Council seminar series on Fat Studies and Health at Every Size (HAES). Written by scholars from a range of disciplines and the health professions, themes include: an interrogation of statistical procedures used to construct the obesity epidemic, overweight and obesity as cultural signifiers for Type 2 diabetes, understandings of healthy eating and healthy weight in a 'problem' population, gendered expectations on men and women to lose weight, the visual representation of obesity, tensions when researching (anti-)fatness, critical dietitians' engagement with HAES, alternative ways of promoting physical activity, and representations of obesity in the media. This book was originally published as a special issue of Critical Public Health.

A rare, documented account of the life of a Crow medicine woman, drawn from interviews conducted by legendary writer and ethnographer Frank Bird Linderman and told in her own words. In the spring of 1931, Pretty-shield, a grandmother and medicine healer in the Crow tribe, met Frank Linderman for a series of interviews. When Linderman asked Pretty-shield about her life, the old woman relaxed and laughed. "We shall be here until we die." In this rich account, Linderman, using sign language and an interpreter, pieces together the story of Pretty-shield's extraordinary life, from her youth migrating across the High Plains with her people to their forced settlement on the reservation, to how she became a medicine woman. Pretty-shield vividly recalls the centuries-long traditions of the Crow people, bringing into focus the many complex facets of Crow womanhood and the ways in which Indigenous communities care for each other. Pretty-shield: Medicine Woman of the Crows reveals the everyday concerns and deep-rooted customs of tribal life for a new generation coming to terms with the violence and racism of America's past, and offers a fascinating and authentic portrait of the Crow, their customs and traditions, their relationship to nature and healing, and the timeless insights of their lived experiences. As Pretty-shield reminds us, "Listen to the old ones. . . keep their wisdom within your heart, and understand that wisdom in your mind." An essential contribution to the American experience, Pretty-shield illuminates a segment of our society which has for too long been relegated to the shadows of history, and celebrates Crow life and its contributions to our rich culture.
