The "People Power" Health Superbook: Book 26. Health Insurance Guide (Methods to Pay for Treatment, Fight Your Insurance Company, Medical Billing Fraud) Elsevier Health Sciences

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Congress is required by Article I, Section 6, of the Constitution to determine its own pay. In the past, Congress periodically enacted specific legislation to alter its pay; the last time this occurred affected pay in 1991. More recently, pay has been determined pursuant to laws establishing formulas for automatic adjustments. Chapter 1 provides historical tables on the rate of pay for Members of Congress since 1789; details on enacted legislation with language prohibiting the automatic annual pay adjustment since the most recent adjustment; the adjustments projected by the Ethics Reform Act as compared with actual adjustments in Member pay; and Member pay in constant and current dollars since 1992. Chapter 2 contains information on actions taken affecting each pay year since the establishment of the Ethics Reform Act adjustment procedure. Chapter 3 provides basic information on congressional salaries and allowances and recent developments. Chapter 4 provides pay data for 16 staff position titles that are typically used in Senators' offices. Chapter 5 provides pay data for 13 staff position titles

that are used in Senate committees, and for which sufficient data could be identified. Chapter 6 provides pay data for 12 staff position titles that are typically used in House Members' offices. Chapter 7 provides pay data for 11 staff position titles that are used in House committees. The federal government, as an employer, also offers health benefits to its employees and retirees.<sup>1</sup> In general, federal employees receive health benefits through the Federal Employees Health Benefits (FEHB) Program, administered by the Office of Personnel Management (OPM). In addition to health insurance coverage, chapter 8 describes other health benefits available to Members and congressional staff, including the Federal Flexible Spending Account Program (FSAFEDS); the Federal Employees Dental and Vision Insurance Program (FEDVIP); the Federal Long Term Care Insurance Program (FLTCIP); the Office of the Attending Physician; and treatment in military facilities. Chapter 9 examines the historical development and contemporary role of Congressional Member Organizations (CMOs) in the House, as well as informal Member groups in the House, Senate, and across the chambers. Commonly, these groups are referred to as caucuses, but they will be referred to collectively as informal Member organizations in this chapter to avoid confusion with official party caucuses. Many interns serve Congress, assisting individual Members, committees, and other offices or support services. Interns serve the House or Senate in a temporary capacity, primarily for an educational benefit, although some interns may receive pay for their service. Chapter 10 addresses frequently asked questions (FAQs) about congressional interns and internships.

In the most important health insurance study ever conducted researchers at the RAND Corporation devised all experiment to address two key questions in health care financing: how much more medical care will people use if it is provided free of charge, and what are the consequences for their health? For three- or five-year periods the experiment measured both use and health outcomes in populations carefully selected to be representative of both urban and rural regions throughout the United States. Participants were enrolled in a range of insurance plans requiring different levels of copayment for medical care, from zero to 95 percent. The researchers found that in plans that reimbursed a higher proportion of the bill, patients used substantially more services - indeed, those who paid nothing used 40 percent more services than those required to pay a high deductible - but the effect on the health of the average person was negligible. In addition, participants who were assigned at random to a well-established health maintenance organization used hospitals substantially less than those in the fee-for-service system, again with no measurable effect on the health of the average person. This book collects in one place for the first time results previously dispersed through many journals over many years. Drawing comprehensive, coherent conclusions from an immense amount of data, it is destined to be a classic work serving as an invaluable reference for all those concerned with health care policy - health service researchers, policymakers in both the public and the private sectors, and students.

Medical Insurance is designed around the revenue cycle with each part of the book dedicated to a section of the cycle followed by case studies to apply the skills discussed in each section. The revenue cycle now follows the overall medical documentation and revenue cycle used in practice management/electronic health records environments and applications. Because of the mandate to the healthcare industry to adopt ICD-10-CM/PCS on October 1, 2015, you must work to gain expertise using this coding system. For this reason, ICD-10 is the diagnostic coding system taught and exemplified in *Medical Insurance: A Revenue Cycle Process Approach*.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

ERISA and Health Insurance Subrogation In All 50 States is the most complete and thorough treatise covering the complex subject of ERISA and health insurance subrogation ever published. NEW TO THE FIFTH EDITION! • Updated To Include All The Newest Case Law! • Updated To Include Medicaid Subrogation and Preemption of FEHBA ! • New Plan Language Recommendations! • Complete Health Insurance Subrogation Laws In All 50 States • Covers The Application of ERISA In Every Federal Circuit The Fifth Edition of ERISA and Health Insurance Subrogation In All 50 States has been completely revised, edited, and reorganized. This was partly to reflect the new direction recent case decisions have taken regarding health insurance subrogation as well as the crystallization of formerly uncertain and nebulous areas of the law which have now received some clarity. An entirely new chapter entitled, "What Constitutes Other Appropriate Equitable Relief?" has been added and replaces the old Chapter 9, which merely dealt with Knudson and Sereboff. The new edition introduces new state court decisions addressing the issue of causation and whether and when a subrogated Plan seeking reimbursement must prove that the medical benefits it seeks to recover were causally related to the original negligence of the tortfeasor. An entirely new section was added concerning the subrogation and reimbursement rights of Medicare Advantage Plans, a statutorily-authorized Plan which provides the same benefits an individual is entitled to recover under Medicare. This includes recent case law which detrimentally affects the rights of such Plans to subrogate. Also added to the new edition is additional law and explanation regarding Medicaid subrogation, including the differentiation between "cost avoidance" and "pay and chase" when it comes to procedures for paying Medicaid claims. Significant improvements have been made to suggested Plan language which maximizes a Plan's subrogation and reimbursement rights. The suggested language stems from recent decisions and developments in ERISA and health insurance subrogation from around the country since the last edition. The new edition has been completely reworked both in substance and organization. Recent case law has necessitated consolidation of several portions of the book and elimination or editing of others. A new section entitled "Liability of Plaintiff's Counsel" has been added, which provides a clearer exposition on the laws applicable and remedies available when plaintiff's attorneys and Plan beneficiaries settle their third-party cases and fail to reimburse the Plan. Also new to the book are recently-passed anti-subrogation measures such as Louisiana's Senate Bill 169, § 1881, which states that no health insurer shall seek reimbursement from automobile Med Pay coverage without first obtaining the written consent of the insured. The new edition also goes into much greater detail on the procedures for and law underlying the practice of removal of

---

cases from state court to federal court, and the possibility of remand back to state court. This includes the Federal Courts Jurisdiction and Venue Clarification Act of 2011, effective Jan. 6, 2012, which amended federal removal, venue, and citizenship determination statutes in very significant ways. The new edition also delves into, for the first time, the role which the federal Anti-Injunction Act plays when beneficiaries sue in state court to enforce the terms of an ERISA Plan, while the Plan files suit in federal court seeking an injunction against the state court action. New case law and discussion on preemption of FEHBA subrogation and reimbursement claims have been added to Chapter 10 in the wake of new decisions regarding same.
