That's how Wendell Potter introduced himself to a Senate committee in June 2009. He proceed to explain how insurance companies make promises they have no intention of keeping, how they flout regulations designed to protect consumers, and how they make it nearly impossible to understand information that the public needs. Potter quit his high-paid job as head of public relations at a major insurance corporation because he could no longer

---

abide the routine practices of the insurance industry, policies that amounted to a death sentence for thousands of Americans every year. In *Deadly Spin*, Potter takes readers behind the scenes of the insurance industry to show how a huge chunk of our absurd healthcare expenditures actually bankrolls a propaganda campaign and lobbying effort focused on protecting one thing: profits. With the unique vantage of both a whistleblower and a high-powered former insider,

Potter moves beyond the healthcare crisis to show how public relations works, and how it has come to play a massive, often insidious role in our political process-and our lives. This important and timely book tells Potter's remarkable personal story, but its larger goal is to explain how people like Potter, before his change of heart, can get the public to think and act in ways that benefit big corporations-and the Wall Street money managers who own them.
