Sports medicine continues to be a rapidly evolving field of study. The Sixth Edition of Concepts of Athletic Training focuses on the care and management of sport and activity related injuries while presenting key concepts in a comprehensive, logically sequential manner that will assist future professionals in making the correct decisions when confronted with an activity-related injury or illness in their scope of practice. Chapters have a good mixture of text, tables, and illustrations to make learning easy and fun and the material is presented in a fashion that is succinct yet provides the student with plenty of direction to get more in depth information as needed. Initial decisions and subsequent actions are critical in determining the outcome of a sports injury. This well established text addresses not only the concepts of athletic training to the student, but provides information that will assist the potential coach or other individuals involved in sports medicine.

Pathology and Pathophysiology Correlations Jones & Bartlett Learning
The number and complexity of health promotion programs continues to grow as professionals, the public, and policymakers embrace prevention and health education as essential elements of the nation's well being. Additionally, the scope of health promotion programs is increasing as globalization and shifting demographics (i.e. aging, immigration) expand the range of activities and initiatives underway. Unfortunately, while the need is great and growing, the requisite skills for managing these programs continue to have a mixed review.

Managing Health Education and Promotion Programs, Second Edition specifically addresses management and leadership in health promotion programs. This book serves as a core text for students of public and community health, both at the graduate and undergraduate levels.
