[2020 Handbook of Emergency Cardiovascular Care for Healthcare Providers \(International English\)](#) Kg-EKG Press
Principles of Ethics and

Personal Leadership (PEPL) provides EMS and mobile healthcare (MHC) practitioners at all levels with the knowledge and skills they need to effectively interact with patients and their families, other medical personnel, co-workers, supervisors, and the community. The course provides students with a deeper understanding of the basic principles of ethical leadership and service to patients, as well as an awareness of the

leadership challenges facing today's EMS and MHC practitioners. This course assists students in identifying their personal responsibility and accountability for ethical decision making and for the exercise of ethical servant leadership for themselves, their patients, and their profession. Many communities are exploring new models for delivering medical care to improve patient outcomes and reduce costs. Through course presentations, discussions, and learning activities, this interactive course offers essential foundational training that advances the professional development of participants. Students successfully completing the PEPL course will be eligible for continuing education credits.

Pediatric Emergency Assessment, Recognition, and Stabilization Jones & Bartlett Learning

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is

fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. *Strategies to Improve Cardiac Arrest Survival* examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery

of patients. The recommendations of *Strategies to Improve Cardiac Arrest Survival* provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Vascular Access and Medications combined into one chapter to present venous circulation information with all relevant common medications used during a cardiac-related emergency.

CPR/AED for the Professional Rescuer Test Prep Books

Co-edited and written by an interdisciplinary team of experts in oncology and cardiology, this book is a clinically useful resource on these overlapping topics: "

Cardiac complications in patients receiving cancer therapy " The treatment of cancer in patients with cardiovascular disease " The treatment of cardiovascular disease

in patients with cancer When relevant to medical practice, epidemiology and basic science are also included in the discussion and each chapter is written by an oncologist and a cardiologist.

Additionally, the chapters follow a similar format to make the book truly interdisciplinary, user-

friendly, and clinically applicable to specialists and non-specialists who care for patients with both cancer and cardiovascular disease.

BLS Reference Card

The AHA's ACLS course builds on the foundation of survival BLS skills, emphasizing the importance of continuous, high-quality CPR.

Reflects science and education from the American Heart Association Guidelines Update for CPR and Emergency

Cardiovascular Care (ECC). Here

we've brought best Exam practice questions for you so that you can prepare well for this exam. Unlike other online simulation practice tests, you get a Paperback version

that is easy to read & remember these questions. You can simply rely on these questions for successfully certifying this exam.

Heartsaver AED

This comprehensive book provides practical guidance on the care of the critical patient in the emergency department. It focuses on the ED physician or provider working in a community hospital where, absent the consulting specialists

found in a large academic center, the provider must evaluate and stabilize critically ill and injured patients alone. Structured in an easily accessible format, chapters present fundamental information in tables, bullet points, and flow diagrams. Emergency medicine scenarios covered across 38 chapters include acute respiratory failure, spinal cord Injuries, seizures and status epilepticus, care of the newborn, and end-of-life care. Written by experts in the field, Emergency Department Critical Care is an essential resource for practicing emergency physicians and trainees, internists and family physicians, advance practice nurses, and physician ' s assistants who provide care in emergency departments and urgent care centers.
