“Provocative [and] shocking.”—The Washington Post Before the nightmares began, Yeong-hye and her husband lived an ordinary, controlled life. But the dreams—invasive images of blood and brutality—torture her, driving Yeong-hye to purge her mind and renounce eating meat altogether. It’s a small act of independence, but it interrupts her marriage and sets into motion an increasingly grotesque chain of

events at home. As her husband, her brother-in-law and sister each fight to reassert their control, Yeong-hye obsessively defends the choice that’s become sacred to her. Soon their attempts turn desperate, subjecting first her mind, and then her body, to ever more intrusive and perverse violations, sending Yeong-hye spiraling into a dangerous, bizarre estrangement, not only from those closest to her, but also from herself. Celebrated by critics around the world, *The Vegetarian* is a darkly allegorical, Kafka-esque tale of power, obsession, and one woman’s struggle to break free from the violence both without and within her. Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

In a world of rising tensions between Russia and
the United States, the Middle East and Europe,
Sunnis and Shiites, Islamism and liberalism,
Turkey is at the epicentre. And at the heart of
Turkey is its right-wing populist president, Recep
Tayyip Erdoğan. Since 2002, Erdoğan has
consolidated his hold on domestic politics while
using military and diplomatic means to solidify
Turkey as a regional power. His crackdown has
been brutal and consistent - scores of journalists

arrested, academics officially banned from leaving
the country, university deans fired and many of
the highest-ranking military officers arrested. In
some senses, the nefarious and failed 2016 coup
has given Erdoğan the licence to make good on
his repeated promise to bring order and stability
under a 'strongman'. Here, leading Turkish expert
Soner Cagaptay will look at Erdoğan's roots in
Turkish history, what he believes in and how he
has cemented his rule, as well as what this means
for the world. The book will also unpick the
'threats' Erdogan has worked to combat - from
the liberal Turks to the Gulen movement, from
coup plotters to Kurdish nationalists - all of which
have culminated in the crisis of modern Turkey.

If there is a literary gene, then the Waugh family most certainly has it—and it clearly seems to be passed down from father to son. The first of the literary Waughs was Arthur, who, when he won the Newdigate Prize for poetry at Oxford in 1888, broke with the family tradition of medicine. He went on to

become a distinguished publisher and an immensely influential book columnist. He fathered two sons, Alec and Evelyn, both of whom were to become novelists of note (and whom Arthur, somewhat uneasily, would himself publish); both of whom were to rebel in their own ways against his bedrock Victorianism; and one of whom, Evelyn, was to write a series of immortal novels that will be prized as long as elegance and lethal wit are admired. Evelyn begat, among seven others, Auberon Waugh, who would carry on in the family tradition of literary skill and eccentricity, becoming one of England's most incorrigibly cantankerous and provocative newspaper columnists, loved and loathed in equal measure. And Auberon begat Alexander, yet another writer in the family, to

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity

may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

specialty is the American economy—and the
mystery of why it so often fails the American
public. From the financial crisis of 2008 to rising
student debt to collapsing public infrastructure,
she found a root problem: racism in our politics
and policymaking. But not just in the most
obvious indignities for people of color. Racism
has costs for white people, too. It is the common
denominator of our most vexing public problems,

the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world’s advanced economies, has thwarted universal healthcare. But in unlikely places of

worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can’t do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game. **LONGLISTED FOR THE ANDREW CARNEGIE MEDAL**

profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation ' s history and current crisis. Americans have built an empire on the idea of " race, " a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates ' s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth

about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear;

we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization.
