The Four Loves is a 1960 book by C. S.
Lewis which explores the nature of love
from a Christian and philosophical
perspective through thought experiments.
The book was based on a set of radio talks
from 1958 which had been criticized in the
U.S. at the time for their frankness about
sex. C.S. Lewis examines storge or
empathy love; philia, friendship love; eros,
romantic love; and agape, or God love.
Excerpt: "GOD is love," says St. John.
When I first tried to write this book I
thought that his maxim would provide me
with a very plain highroad through the
whole subject. I thought I should be able to
say that human loves deserved to be called
loves at all just in so far as they resembled

that Love which is God."

Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed

novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays

and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-

proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that

we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive

population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous

future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth. *Hannah's Luck* Pan Macmillan Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations. He then develops a new and far-reaching theory. Bound Hearts Ellora's Cave Publishing, Incorporated NATIONAL BESTSELLER "A profound book.... It will break your heart but also leave you with hope." —J.D. Vance, author of *Hillbilly Elegy* "[A] deeply empathetic book." —The Economist With stark photo essays and unforgettable true stories, Chris Arnade cuts through "expert" pontification on inequality, addiction, and poverty to allow those who have

been left behind to define themselves on their own terms. After abandoning his Wall Street career, Chris Arnade decided to document poverty and addiction in the Bronx. He began interviewing, photographing, and becoming close friends with homeless addicts, and spent hours in drug dens and McDonald's. Then he started driving across America to see how the rest of the country compared. He found the same types of stories everywhere, across lines of race, ethnicity, religion, and geography. The people he got to know, from Alabama and California to Maine and Nevada, gave Arnade a new respect for the dignity and resilience of what he calls America's Back Row--those who lack the credentials and advantages of the so-called meritocratic upper class. The strivers in the Front Row, with their advanced degrees and upward mobility, see the Back Row's

values as worthless. They scorn anyone who stays in a dying town or city as foolish, and mock anyone who clings to religion or tradition as naïve. As Takeesha, a woman in the Bronx, told Arnade, she wants to be seen she sees herself: "a prostitute, a mother of six, and a child of God." This book is his attempt to help the rest of us truly see, hear, and respect millions of people who've been left behind.

Twenty-three centuries after its compilation, 'The Politics' still has much to contribute to this central question of political science. Aristotle's thorough and carefully argued analysis is based on a study of over 150 city constitutions, covering a huge range of political issues in order to establish which types of constitution are best - both ideally and in particular

circumstances - and how they may be maintained.

Aristotle's opinions form an essential background to the thinking of philosophers such as Thomas Aquinas, Machiavelli and Jean Bodin and both his premises and arguments raise questions that are as relevant to modern society as they were to the ancient world.
