Norwood Russell Hanson was one of the most important philosophers of science of the post-war period. Hanson brought Wittgensteinian ordinary language philosophy to bear on the concepts of science, and his treatments of observation, discovery, and the theory-ladenness of scientific facts remain central to the philosophy of science. Additionally, Hanson was one of philosophy's great personalities, and his sense of humor and

charm come through fully in the pages of *Perception and Discovery*. *Perception and Discovery*, originally published in 1969, is Hanson's posthumous textbook in philosophy of science. The book focuses on the indispensable role philosophy plays in scientific thinking. *Perception and Discovery* features Hanson's most complete and mature account of theory-laden observation, a discussion of conceptual and logical boundaries, and a detailed treatment of the epistemological features of scientific research and scientific reasoning. This book is of interest to scholars of philosophy of science, particularly those concerned with Hanson's thought and the development of the discipline in the middle of the 20th century. However, even fifty years after Hanson's early death, *Perception and Discovery* still has a great deal to offer all readers interested in science.

“ Old landmarks fall in nearly every block ... and the face of the city is changing so rapidly that the time is not too far distant when a search for a building 50 years old will be in vain. ” — Herald, 1925. The demolition firm of Whelan the Wrecker was a Melbourne institution for a hundred years (1892-1992). Its famous sign — ‘ Whelan the Wrecker is Here ’ on a pile of shifting rubble — was a laconic masterpiece and served as a vital sign of the

city ’ s progress. It ’ s no stretch to say that over three generations, the Whelan family changed the face of Melbourne, demolishing hundreds of buildings in the central city alone. In *A City Lost and Found*, Robyn Annear uses Whelan ’ s demolition sites as portals to explore layers of the city laid bare by their pick-axes and iron balls. Peering beneath the rubble, she brings to light fantastic stories about Melbourne ’ s building sites and their many incarnations. This is a book about the making — and remaking — of a city.

In the present tumult of online media discourse, the contributors frame podcasting as indicative of a ' new aural culture ' emerging from an identifiable set of industrial, technological and cultural circumstances. The analyses in this collection offer a range of interpretations which begin to open avenues for further research into a distinct Podcast Studies.
