Eric Brown's original Helix (2007) was merely an introduction in what the Helix has in store in terms of alien culture and alien architecture. Recall first reading Larry Niven's Ringworld (1970) and remember gaping at awe in the possibilities of exploring its swathe of cultures and plumbing the depths of its remarkable architecture?

I enjoyed Brown's epic perspective, but the book felt a little lacking in the 3rd dimension. The sheer size of the Helix (which is itself a marvellous concept) is conveyed well, or at least as well as such size can be conveyed, both by prose, and by the reaction of the characters. But somehow I never really felt drawn down to ground level.

Unfortunately, Helix has been another disappointment. Similarly as there is a whole category of films loosely defined as "B" movies, the same happens with Science Fiction. And after having read two books by Eric Brown, I can conclude that he unfortunately seems to belongs to the group of "B" science fiction authors.

Helix is my first Eric Brown novel although I have had Kings of Eternity on my wish list for some time. I really rather enjoyed its naïve charm and simple narrative; if I had attempted to write a science fiction novel when I was sixteen after having been immersed, as I was, in the works of the old masters of the genre then this is the type of story I would have produced, albeit without Brown's evident penmanship.

Following on from the earlier book Helix, where a human starship crashes onto a huge and spectacular helix shaped construct containing thousands of worlds, Helix Wars continues the story a couple of hundred years later. It's a good yarn, no doubt about it, but this was definitely my least enjoyed Eric Brown story to date.
