The Four Legendary Kingdoms Pan

In our "wireless" world it is easy to take the importance of the undersea cable systems for granted, but the stakes of their successful operation are huge, as they are responsible for carrying almost all transoceanic Internet traffic. In *The Undersea Network* Nicole Starosielski follows these cables from the ocean depths to their landing zones on the sandy beaches of the South Pacific, bringing them to the surface of media scholarship and making visible the materiality of the wired network. In doing so, she charts the cable

network's cultural, historical, geographic and environmental dimensions. Starosielski argues that the environments the cables occupy are historical and political realms, where the network and the connections it enables are made possible by the deliberate negotiation and manipulation of technology, culture, politics and geography. Accompanying the book is an interactive digital mapping project, where readers can trace cable routes, view photographs and archival materials, and read stories about the island cable hubs.

**It's Complicated** Pan

A startling debut about the extraordinary end of a marriage and its very strange aftermath. Meet Lizzie Prain. She is an ordinary housewife and lives with her lovely dog and her husband, who is a bit of a difficult fellow, in a quiet cottage in British country side. She's a wonderful cook. She enjoys her garden. And, occasionally, she makes cakes for the village parties. No one has seen Lizzie's husband, Jacob, for a few days. That's because last Monday and Lizzie snapped and cracked him on

---

the head with her garden shovel. No one quite misses Jacob though, and Lizzie surely didn't kill him on purpose. And now that she has the chance to live beyond his shadow, she won't neglect her good fortune. Over the course of the following month, with a body to get rid of and few fail-proof options at hand, Lizzie will channel her most practical instincts and do what she does best: she'll cook Jacob, and she'll eat him. But when Lizzie inadvertently befriends an isolated misfit, she will be tested: Will Lizzie turn to this new person for solace and abandon her desperate plan or will her new friend be an unwitting accessory to her crime? Dark, unexpectedly funny, and achingly human, *Season to Taste* is a deliciously subversive treat. In *Lizzie Prain*, Natalie Young has created one of the most remarkable and surprising heroines in fiction.

*Seven Types of Ambiguity* is a psychological thriller and a literary adventure of breathtaking scope. Celebrated as a novelist in the tradition of Jonathan Franzen and Philip Roth, Elliot Perlman writes of impulse and paralysis, empty marriages, lovers, gambling, and the stock market; of adult children and their parents; of poetry and prostitution, psychiatry and the law. Comic, poetic, and full of satiric insight, *Seven Types of Ambiguity* is, above all, a deeply romantic novel that speaks with unforgettable force about the redemptive power of love. The story is told in seven parts, by six different narrators, whose lives are entangled in unexpected ways. Following years of unrequited love, an out-of-work schoolteacher decides to take matters into his own hands, triggering a chain of events that neither he nor his psychiatrist could have anticipated. Brimming with emotional, intellectual, and moral dilemmas, this novel-reminiscent of the richest fiction of the nineteenth century in its labyrinthine complexity-unfolds at a rapid-fire pace to reveal the full extent to which these people have been affected by one another and by the insecure and uncertain times in which they live. Our times, now.

Scarecrow and the Army of Thieves Simon and Schuster

The definitive history of the Defense Advanced Research Projects Agency, the Pentagon agency that has quietly shaped war and technology for nearly sixty years. Founded in 1958 in response to the launch of Sputnik, the agency's original mission was to create "the unimagined weapons of the future." Over the decades, DARPA has been responsible for countless inventions and technologies that extend well beyond military technology. Sharon Weinberger gives us a riveting account of DARPA's successes and failures, its remarkable

---

innovations, and its wild-eyed schemes. We see how the threat of nuclear Armageddon sparked investment in computer networking, leading to the Internet, as well as to a proposal to power a missile-destroying particle beam by draining the Great Lakes. We learn how DARPA was responsible during the Vietnam War for both Agent Orange and the development of the world's first armed drones, and how after 9/11 the agency sparked a national controversy over surveillance with its data-mining research. And we see how DARPA's success with self-driving cars was followed by disappointing contributions to the Afghanistan and Iraq wars. Weinberger has interviewed more than one hundred former Pentagon officials and scientists involved in DARPA's projects—many of whom have never spoken publicly about their work with the agency—and pored over countless declassified records from archives around the country, documents obtained under the Freedom of Information Act, and exclusive materials provided by sources. *The Imagineers of War* is a compelling and groundbreaking history in which science, technology, and politics collide.

“A lovely, lethal, disturbing novel” of the dashed hopes of post-apartheid South Africa and the small betrayals that doom a friendship (*The Guardian*). An extraordinary parable of the corruption of the flesh and spirit, *The Good Doctor* has inspired enthusiastic interest around the world and has assured Damon Galgut's place as a major international talent. When Laurence Waters arrives at his new post at a deserted rural hospital, staff physician Frank Eloff is instantly suspicious. Laurence is everything Frank is not—young, optimistic, and full of big ideas. The whole town is beset with new arrivals and the return of old faces. Frank reestablishes a liaison with a woman, one that will have unexpected consequences. A self-made dictator from apartheid days is rumored to be active in cross-border smuggling, and a group of soldiers has moved in to track him, led by a man from Frank's own dark past. Laurence sees only possibilities—but in a world where the past is demanding restitution from the present, his ill-starred idealism cannot last.

“Galgut's prose, its gentle rhythms and straightforward sentences edging toward revelation, is utterly seductive and suspenseful . . . Galgut is a master of psychological tension. . . .

Tragic and brilliant.” —*The Globe and Mail* (Toronto)

The rule of faith was a summary of apostolic preaching and teaching made by writers of the early Christian centuries. As such it carries great importance for what the early church considered basic to its being and identity. It was not a fixed text, like a creed, but varied in wording and content according to circumstances. Yet, despite this flexibility and diversity, there is a clear Christ-

---

centered, Trinitarian core at the heart of the rule shared by the early apostolic churches. In this short guide, Everett Ferguson introduces readers to the primary sources of our knowledge of the rule, the variety of ways in which ancient Christian authors spoke of the rule, and different scholarly attempts to interpret this ancient evidence. Ferguson argues that statements of the rule of faith were used to instruct new or potential converts, to combat false teachings, and to provide a framework for interpreting the Scriptures. He maintains that the rule retains considerable importance for churches of the twenty-first century.

NATIONAL BESTSELLER • In this extraordinary book, the world's most extraordinary distance swimmer writes about her emotional and spiritual need to swim and about the almost mystical act of swimming itself. Lynne Cox trained hard from age nine, working with an Olympic coach, swimming five to twelve miles each day in the Pacific. At age eleven, she swam even when hail made the water “like cold tapioca pudding” and was told she would one day swim the English Channel. Four years later—not yet out of high school—she broke the men's and women's world records for the Channel swim. In 1987, she swam the Bering Strait from America to the Soviet Union—a feat that, according to Gorbachev, helped diminish tensions between Russia and the United States. Lynne Cox's relationship with the water is almost mystical: she describes swimming as flying, and remembers swimming at night through flocks of flying fish the size of mockingbirds, remembers being escorted by a pod of dolphins that came to her off New Zealand. She has a photographic memory of her swims. She tells us how she conceived of, planned, and trained for each, and re-creates for us the experience of swimming (almost) unswimmable bodies of water, including her most recent astonishing one-mile swim to Antarctica in thirty-two-degree water without a wet suit. She tells us how, through training and by taking advantage of her naturally plump physique, she is able to create more heat in the water than she loses. Lynne Cox has swum the Mediterranean, the three-mile Strait of Messina, under the ancient bridges of Kunning Lake, below the old summer palace of the emperor of China in Beijing. Breaking records no longer interests her. She writes about the ways in which these swims instead became vehicles for personal goals, how she sees herself as the lone swimmer among the waves, pitting her courage against the odds, drawn to dangerous

places and treacherous waters that, since ancient times, have challenged sailors in ships.
