Directories & Books

Written for the do-it-yourselfer, good enough for the pro. Includes everything you wish to know about your vehicles heating and air conditioning. From simple adjustments, to complete tune-ups and troubleshooting.

**The Haynes Automotive Heating & Air-conditioning Systems Manual** Goodheart-Willcox Pub

This user's manual was developed as a companion document to ASHRAE Standard 15-2001. It does not reflect the addenda and changes incorporated into Standard 15-2004. The User's Manual clarifies the intent of the Standard and provides an explanation of the rationale behind it. It eases use of the standard by including illustrations and examples of accepted industry practice, as well as explanations of and supporting references for formulas in the Standard. This guide also covers building, system, and refrigerant classifications, restrictions on refrigerant use, installation restrictions, and equipment and system design and construction. The User's Manual includes information on mechanical and absorption refrigeration systems for commercial, residential, and industrial applications.
