Hi, Arun before testing any  
electrical component in the  
Starting Circuit it is  
"IMPERATIVE" that you have a  
fully charged battery of 12.5 volts  
or more and be able to pass a  
proper "LOAD" test if necessary,

you may have a preliminary  
reading of 12.5 volts or more but  
little or zero amperage, the battery  
is faulty and must be replaced.
