In the age of satellites and the Internet, worldwide

communication has become increasingly unified
amid overblown claims about the redemptive
possibilities of international networks. But this
rhetoric is hardly new. As Armand Mattelart
demonstrates in *Networking the World,
1794-2000*, globalization and its attendant hype
have existed since road and rail were the fastest
way to move information. Mattelart plates
contemporary global communication networks
into historical context and shows that the
networking of the world began much earlier than
many assume, in the late eighteenth century. He
argues that the internationalization of
communication was spawned by such
Enlightenment ideals as universalism and
liberalism, and examines how the development of
global communications has been inextricably
linked to the industrial revolution, modern
warfare, and the emergence of nationalism.
Throughout, Mattelart eloquently argues that
discourses of better living through globalization
often mask projects of political, economic, and
cultural domination.

A welfare cheque floats down the river, a cowboy spreads the Word of the Lord and crotches tick like clocks: the world of Spare Parts is unpredictable, evocative and vividly distorted. Its initial appearance, in 1981, caused a stir; at a time when linear narrative was the m.o. of feminist writing, Gail Scott had the nerve to fracture and dislocate her stories and her language. Spare Parts is as vital as it was twenty years ago. Scott's densely textured tales about the world of growing up female in a small town, where violence lurks just beneath the skin, recreate the uncertainty of life. Their incantatory language and tough imagery are as relevant and crucial now as they were then. This edition adds two new pieces, including 'Bottoms Up', an essay on narrative which first appeared on the 'Narrativity' website Scott co-edits.

He brings into focus its practice and applications with cases and examples from
