Roxy Peck, Chris Olsen and Jay Devore's new edition uses real data and attention-grabbing examples to introduce students to the study of statistical output and methods of data analysis. Based on the best-selling STATISTICS: THE EXPLORATION AND ANALYSIS OF DATA, Fifth Edition, this new INTRODUCTION TO STATISTICS AND DATA ANALYSIS, Second Edition integrates coverage of the graphing calculator and includes expanded coverage of probability. Traditional in structure yet modern in approach, this text guides students through an intuition-based learning process that stresses interpretation and communication of statistical information. Conceptual comprehension is cemented by the simplicity of notation--frequently substituting words for symbols. Simple notation helps students grasp concepts. Hands-on activities and Seeing Statistics applets in each chapter allow students to practice statistics firsthand.

At a time when society is demanding accountability from the medical education

system and residency review committees are demanding written curricula, this book offers a practical, yet theoretically sound, approach to curriculum development in medicine. Short, practical, and generic in its approach, the book begins with an overview of a six-step approach to curriculum development. Each succeeding chapter then covers one of the six steps: problem identification, targeted needs assessment, goals and objectives, education methods, implementation, and evaluation. Additional chapters address curriculum maintenance, enhancement, and dissemination. Throughout, examples are used to illustrate major points. An appendix provides the reader with a selected list of published and unpublished resources on funding, faculty development, and already developed curricula.

Comprised of 200 readable and informative historic vignettes reflecting all areas of Senate activities, from the well known and notorious to the unusual and whimsical. Prepared by Richard A. Baker, the Senates Historian, these brief sketches, each with an accompanying illustration and references for further reading, provide striking insights into the colorful and momentous history of The World's Greatest Deliberative Body. Review from Goodreads: "Jason" rated this book with 3 stars and had this to say "This coffee table book on Senate History comes from none other than the U.S. Senate Historian, Richard Baker. The House of Representatives recently acquired noted historian of the Jacksonian era, Robert Remini as the official House Historian. He recently wrote a pretty impressive tomb on the House of Representatives. The Senate already has a 4 volume history written by US Senator, Robert C. Byrd of West Virginia, so the Senate could not reply in that manner. So, I think the coffee table book was the best that we could muster. I think this is the first time I have actually read a coffee table book from cover to cover. It is a chatty little story book filled with useful cocktail-party-history of the US Senate. That's useful knowledge to me, as I never know what to say at Washington cocktail parties. Perhaps anecdotes about Thomas Hart Benton will help break the ice. The most striking thing to me about the book was the number of attacks on the Capitol. I had heard about all the incidents individually, but it is more jolting to see them sequentially. 3 bombings, 2 gun attacks and then the attempt on September 11th. In a way, its remarkable that the Capitol complex remained so open for so long. Note, I use the past tense here. As any of you who have visited the capitol recently will have noted, it is increasingly difficult to get in. And once the Capitol Visitor Center is completed, I expect it will be very much a controlled experience like the

White House. In any case, Baker's prose is breezy and he is dutifully reverent to the institution without missing the absurdities of Senate life. You also get a sense of the breakdown in lawfulness that preceded the Civil War. Its not just the canning of Charles Sumner, its also the Mississippi Senator pulling a gun on Missouri Senator Thomas Hart Benton in the Senate chamber. Then there is the case of California Senator David Broderick (an anti-slavery Democrat) being killed in a duel by the pro-slavery Chief Justice of the California Supreme Court. Apparently, back in those days, California was a lot more like modern Texas. In any case, the slide toward anarchy can definitely be found long before Fort Sumter. Another interesting aside that I really never knew concerns the order of succession. All of us learn in school that it is the President, then the Vice President, then the Speaker of the House and then President Pro Tempore of the Senate. After that, you get the members of the Cabinet, and I was aware that as new departments were created, they have been shuffled up a bit. What I did not know, is that Congress was not always in the order of succession at all. For a long time, it devolved from the President to the VP and then directly to the Secretary of State. Furthermore, when they first inserted Congress, it was the President Pro Tempore of the Senate who was third in line over the Speaker of the House. The structure we all know and love was only finalized in 1947 after some hard thinking in light of FDR's demise and the Constitutional Amendments on succession that followed. Anyway, this is a book for government geeks. If you are one, its a nice read and about as pleasant a way to introduce yourself to Senate history as I have found. If not, there are prettier coffee table books to be had."

Open-access edition: DOI 10.6069/9780295748856 Beginning in the late nineteenth century, India played a pivotal role in global conversations about population and reproduction. In *Reproductive Politics and the Making of Modern India*, Mytheli Sreenivas demonstrates how colonial administrators, postcolonial development experts, nationalists, eugenicists, feminists, and family planners all aimed to reform reproduction to transform both individual bodies and the body politic. Across the political spectrum, people insisted that regulating reproduction was necessary and that limiting the population was essential to economic development. This book investigates the often devastating implications of this logic, which demonized some women's reproduction as the cause of national and planetary catastrophe. To tell this story, Sreenivas explores debates about marriage, family, and contraception. She also demonstrates how concerns about reproduction surfaced within a range of political questions—about poverty and crises of subsistence, migration and claims of national sovereignty, normative heterosexuality and drives for economic development. Locating India at the center of transnational historical change, this book suggests that Indian developments produced the very grounds over which reproduction was called into question in

the modern world. The open-access edition of *Reproductive Politics and the Making of Modern India* is freely available thanks to the TOME initiative and the generous support of The Ohio State University Libraries. Curriculum Development for Medical Education Routledge

How did neighborhood groceries, parish halls, factories, and even saloons contribute more to urban vitality than did the fiscal might of postwar urban renewal? With a novelist's eye for telling detail, Douglas Rae depicts the features that contributed most to city life in the early "urbanist" decades of the twentieth century. Rae's subject is New Haven, Connecticut, but the lessons he draws apply to many American cities. *City: Urbanism and Its End* begins with a richly textured portrait of New Haven in the early twentieth century, a period of centralized manufacturing, civic vitality, and mixed-use neighborhoods. As social and economic conditions changed, the city confronted its end of urbanism first during the Depression, and then very aggressively during the mayoral reign of Richard C. Lee (1954 – 70), when New Haven led the nation in urban renewal spending. But government spending has repeatedly failed to restore urban vitality. Rae argues that strategies for the urban future should focus on nurturing the unplanned civic engagements that make mixed-use city life so appealing and so civilized. Cities need not reach their old peaks of population, or look like thriving suburbs, to be once again splendid places for human beings to live and work.

Deeper learning, dialogic learning, and critical thinking are essential capabilities in the 21st-century environments we now operate. Apart from being important in themselves, they are also crucial in enabling the acquisition of many other 21st-century skills/capabilities such as problem solving, collaborative learning, innovation, information and

media literacy, and so on. However, the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning, dialogic learning, and critical thinking in their students. This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion. The problem is bridging the gap between the educational researchers' work and what gets conveyed to teachers and instructors as evidence-based, usable strategies. This book addresses that gap: in it, leading scholars from around the world describe strategies they have developed for successfully cultivating students' capabilities for deeper learning and transfer of what they learn, dialogic learning and effective communication, and critical thought. They explore connections in the promotion of these capabilities, and they provide, in accessible form, research evidence demonstrating the efficacy of the strategies. They also discuss answers to the questions of how and why the strategies work. A seminal resource, this book creates tangible links between innovative educational research and classroom teaching practices to address the all-important question of how we can realize our ideals for education in the 21st century. It is a must read for pre-service and in-service teachers, teacher educators and professional developers, and educational researchers who truly care that we deliver education that will prepare and serve students for life.
