### Evolution in H.G. Wells's "The Time Machine" e-artnow

The Research Magnificent H. G. Wells - The Research Magnificent is a 1915 novel by H. G. Wells. The text of this novel of ideas presents itself as a book that has been written as the result of a promise to a dying man. William Porphyry Benham is a man who has lived a life devoted to a complicated, protean idea: "that he had to live life nobly and thoroughly." He has left behind him "half a score of patent files quite distended [with papers] and a writing-table drawer-full," and the novel is by implication what his friend White, who has promised to "see after your book," has produced to acquit himself of the promise, since the papers themselves are "an indigestible aggregation." Benham is a man of means due to curious circumstances: his mother left his father, a schoolmaster, for a wealthy man named Nolan who died soon thereafter, but not before leaving "about a third of his very large fortune entirely to Mrs. Benham and the rest to her in trust for her son, whom he deemed himself to have injured." His mother subsequently marries a great London surgeon and becomes Lady Marayne; her indiscretion is forgiven and she enjoys a position of privilege. The bulk of the novel recounts Benham's effort to live nobly, which brings him into conflict with his mother, with his friend Prothero, a schoolboy chum who becomes a Cambridge don, and with his wife, Amanda, a young woman he loves passionately but then leaves behind in England to travel the world (India, Russia, China) in search of wisdom. It is in Johannesburg, South Africa, that Benham is fatally shot while attempting to stop soldiers firing at strikers. The body of the novel is preceded by a 55-page "prelude" entitled "On Fear and Aristocracy" that explains Benham's lifelong perplexity at the failure of human beings to be noble, and his early belief that the conquest of fear is the essence of the noble life. The six chapters of the novel, which tell Benham's life story, explore this perplexity. Benham dies in the midst of his quest, but his papers show that he has arrived at the tentative conclusion that there are four impediments, or "limitations" as he labels them, that keep human beings from living nobly: (1) fear; (2) self-indulgences, including sex; (3) jealousy; and (4) prejudice (by the last he means "the most remarkable array of influences, race-hatred, national suspicion, the evil side of patriotism, religious and social intolerance, every social consequence of muddle headedness, every dividing force indeed except the purely personal dissensions between man and man.") According to biographer David C. Smith, in *The Research Magnificent* Wells is "directly treating the early days of his life with Rebecca West, during which her possessive drive sometimes repelled him, but his sexual need brought him back"; features of his relationship with West include "the pet names, the violent and passionate early encounters, and the words, gestures, and 'business' which Wells needed so badly in his romantic life . . . and not in a comic way as was so often his method for dealing with such matters." It was during the writing of this book that Wells's son by Rebecca West, Anthony West, was born.

### Ann Veronica by H. G. Wells - Delphi Classics (Illustrated)

McFarland Publishing

This book explores the relationship between H.G. Wells's scientific romances and the discourses of science in the 1890s and early years of the twentieth century. It investigates how Wells utilizes his early fiction to participate in a range of topical scientific disputes and, increasingly, as a means to instigate social reform.

The Genius of H. G. Wells: 120+ Sci-Fi Novels & Stories in One Volume Oxford University Press, USA

"In the country of the blind, the one-eyed man is king." Or is he? In H. G. Wells' acclaimed tale, a stranded mountaineer encounters an isolated society in which his apparent advantage proves less than valuable. This thought-provoking fable is accompanied by other short stories, including "The Star," a gripping tale about a massive celestial object hurtling toward the Earth, as well as "The New Accelerator," "The Remarkable Case of Davidson's Eyes," "Under the Knife," and "The Queer Story of Brownlow's Newspaper." With the 1895 publication of his first novel, *The Time Machine*, Wells established himself as the foremost science-fiction writer of his era. This entertaining collection was selected and edited by Martin Gardner, who also provides an Afterword that offers insight into the liveliness and originality of Wells' imagination.

First published in 1933, "The Shape of Things to Come" is science fiction novel written by H. G. Wells. Within it, world events between 1933 and 2106 are speculated with a single superstate representing the solution to all humanity's problems. A classic example of Wellsian prophesy, this volume is highly recommended for fans of his work and of the science fiction genre. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). Many vintage books such as this are becoming increasingly scarce and expensive. Seminar paper from the year 2009 in the subject English Language and Literature Studies - Literature, grade: 1,0, University of Erfurt, course: Dystopia: Wells and Huxley, language: English, abstract: H.G. Wells had been intrigued by speculations about the future progress of humanity towards a more equal society since his youth. (RUDDICK, 2007: 198) Studying at the Normal School of Science he came into contact with the mind-set of Thomas Henry Huxley who militated against the Social Darwinist thoughts which used evolutionary theories and were present in the late-Victorian society at the end of the 19th century. Huxley became an adored men-tor and friend for Wells who transferred and enhanced his ideas in his literature. (JANSING, 1977: 54) The scientific romance *The Time Machine*, which was Wells' s first novel (GLENDENING, 2007: 7), explores the adventures of a respectable late-Victorian scientist within this evolutionary and Social Darwinist context. The scientist travels with his own created time machine into the year 802,701 where he finds the world of Eloi and Morlocks. These two species represent a degen-erated form of man whose retrogression results from socio-economic conditions. An additional journey 30 million years forward in time adds to the image of degeneration in the evolutionary process. This research paper concentrates on the evolutionary and Social Darwinist theme of *The Time Machine*. First, an introduction to Social Darwinist thoughts in the end of the 19th century is given in order to set the context for this sci-en-tific romance. Secondly, the cognition process of the *Time Traveller* is analysed as this will make clear Wells' s examination with the social theories of his time. Studying selected symbols and images finally shows a detailed insight into the evolutionary subject of *The Time Machine*.

### Six Scientific Romances Adapted for Film Read Books Ltd

First published in 1897, *The Invisible Man* is one of the first science fiction stories. The disturbing tale centers on Griffin, a scientist who has discovered the means to make himself invisible. His initial, almost comedic, adventures are soon overshadowed by the bizarre streak of terror he unleashes upon the inhabitants of a small village. Notable for its sheer invention, suspense, and psychological nuance, *The Invisible Man* had been filmed many times and continues to enthrall science-fiction fans today as it did the reading public nearly 100 years ago. *The Promise and Perils of Medical Enhancement* Everyman's Library Much attention has been paid to the scientific romance novels of H.G. Wells, a founder of modern

science fiction and one of the genre's greatest writers. In comparison, little attention has been given by critics to his works of fantasy, which in the opinion of many, are just as artistic and worthy of study. This work, the seventh in The Annotated H.G. Wells series, takes a critical look at Wells' little known fantasy *The Sea Lady: A Tissue of Moonshine*, which is a parable of dark foreboding that unveils the nothingness of utopian dreams and foreshadows Franz Kafka's dark fables of the totalitarian age. A lengthy introduction by the editor provides a comprehensive overview of the text and the story of *The Sea Lady*, and serves to explain the ideas of civil death and every citizen's acting as a public servant, and the concept of totalitarian metaphysics, which deals with a revolt against the limits of the human condition. This work provides a complete, extensively annotated text of the 1902 London first edition of *The Sea Lady*. Prepared by the world's leading Wellsian scholar, the volume also provides germane appendices and a bibliography.

Contents: The Time Machine War of the Worlds The Time Traveller (for so it will be convenient to speak of him) was expounding a recondite matter to us. His grey eyes shone and twinkled, and his usually pale face was flushed and animated. The fire burned brightly, and the soft radiance of the incandescent lights in the lilies of silver caught the bubbles that flashed and passed in our glasses. Our chairs, being his patents, embraced and caressed us rather than submitted to be sat upon, and there was that luxurious after-dinner atmosphere when thought roams gracefully free of the trammels of precision. And he put it to us in this way—marking the points with a lean forefinger—as we sat and lazily admired his earnestness over this new paradox (as we thought it) and his fecundity.

[The Pursuit of Perfection](#) Routledge Kegan & Paul  
Gathered together in one hardcover volume: three timeless novels from the founding father of science fiction. The first great novel to imagine time travel, *The Time Machine* (1895) follows its scientist narrator on an incredible journey that takes him finally to Earth's last moments—and perhaps his own. The scientist who discovers how to transform himself in *The Invisible Man* (1897) will also discover, too late, that he has become unmoored from society and from his own sanity. *The War of the Worlds* (1898)—the seminal masterpiece of alien invasion adapted by Orson Welles for his notorious 1938 radio drama, and subsequently by several filmmakers—imagines a fierce race of Martians who devastate Earth and feed on their human victims while their voracious vegetation, the red weed, spreads over the ruined planet. Here are three classic science fiction novels that, more than a century after their original publication, show no sign of losing their grip on readers' imaginations.

A Critical Edition of H.G. Wells's Scientific Romance Univ of California Press

This is the annotated edition including the rare biographical essay by Edwin E. Slosson called "H. G. Wells - A Major Prophet Of His Time". Several of Mr. Wells's books have been studies of society from the general standpoint; but in some of his later stories, such as "The New Machiavelli" and "The Passionate Friends," he has been more interested in thinking of what the individual life could do in and for society. His book, "The Research Magnificent," is the story of a man who, being unlimited by minor matters, set himself to find some "theory of his work and duty in the world, a plan of the world's future that should give a rule to his life." "A world-state sustained by an aristocracy of noble men," — that idea or theory is not new to a reader of Wells; but here will be found someone who tried to work out some practical way in the matter. "Not a novel," one may readily say,— just as White, the literary man who was called to look over Benham's papers, said, when the magnificent search had come to an end. It is not unlike those autobiographical novels that (as Mr. Wells once wrote) "were popular throughout the third and fourth decades of the twentieth century." It is the work of a novelist, of course,— a story by a man who feels things keenly, a man who is sensitive, appreciative, humorous, whimsical. But it is chiefly a matter of record, valuable for the results it has in it.

*The Island of Doctor Moreau* is an 1896 science fiction novel by H. G. Wells, who called it "an exercise in youthful blasphemy". The text of the novel is the narration of Edward Prendick, a shipwrecked man rescued by a passing boat who is left on the island home of Doctor Moreau, who creates human-like beings from animals via vivisection. The novel deals with a number of philosophical themes, including pain and cruelty, moral responsibility, human identity, and human interference with nature.
