Making Capitalism in China: The Taiwan Connection shows that small- and medium-sized Taiwanese investors are organized in production and marketing networks, not vertically integrated conglomerates. When in China they directly negotiate and establish partnerships with entrepreneurial local officials, not the central bureaucracy. Also, they effectively transfer a capitalist ideology of production to Chinese factory workers. Importantly, the investors attribute their business successes in China to the cultural, historical, and linguistic affinities they share with these local agents. Connections regarding socio-cultural identity do more than facilitate business dealings or ease labor relations; Hsing asserts that partnerships between mainland settlements and overseas Chinese investors constitute a local-global coalition of economic reform, one that strengthens local autonomy in China and bypasses the control of the central government. This coalition is nothing short of a new pattern of foreign direct investment, one profoundly influenced by both cultural boundaries (usually deemed insignificant in matters of capital flow and globalization) and local state agents (who operate in this case as crucial business partners). A notable work that will appeal to all students of East Asian economic organization, ethnic business networks, international investment, and the political economy of socialist transition. Hsing's book is based on hundreds of interviews and participatory observations that she conducted between 1991 and 1996 with investors, local officials, and factory workers in Taiwan, Hong Kong, Guangdong, Fujian, and Shanghai.

Although we now have sophisticated algorithms and techniques for determining the shapes and sizes and for matching the fit between shoes and feet, few, if any, of the books currently available cover these new technologies until now. Bringing together high-quality and state-of-the-art contributions from designers, biomechanists, ergonomists, engineers, podiatrists, and scientists from industry and academia, The Science of Footwear provides an in-depth understanding of the technology and techniques involved in the design and development of a popular and demanding consumer product. This book introduces the design, development, manufacturing, and marketing of footwear. The chapters contain data from past research and the state-of-the art methodologies. They not only cover every aspect of the product design, but also how the footwear industry caters to the wide-ranging needs of sophisticated and demanding customers. The footwear industry has rapidly changed over the last 10 years. Mass production has changed to personalization and mass customization, areas that are not well-understood. This book explores these different concepts in a coherent way, drawing on differing views that give a holistic view of the science behind footwear. Collating information from different disciplines, the book provides the tools to develop the next generation of footwear.

New York Times and USA Today Bestselling series! "Gemma Halliday's Maddie Springer is like the west coast version of Janet Evanovich's Stephanie Plum - only more stylish!" - LG Book Club Maddie Springer is finally walking down the aisle with the man of her dreams. And she's got the perfect wedding planner to pull it all off in style. Well, perfect, that is, until the woman winds up dead - murdered in buttercream icing. Suddenly Maddie's hope of a dream wedding melts faster than an ice sculpture at an outdoor buffet. And when her groom-to-be is assigned the detective in charge of the case, there goes any chance of a honeymoon. Unless, of course, Maddie can find the murderer before her big day. With the help of her fellow fashionista friends, Maddie vows to unveil the cold-blooded killer. Is it the powerful ex-husband, the hot young boy toy, a secret lover from the past, or a billionaire bridezilla on the warpath? As the wedding day grows closer, tempers flare, old flames return, and Maddie's race to the altar turns into a race against time.
