What do you use every day that is small and large, worthless and beyond price? It's easily found in the gutter, yet you may never be able to replace it. You are always losing it but it faithfully protects you; sexy and uptight, it is knitted in to your affections or it may give you nightmares. It has led to conflict, fostered and repressed political

and religious change and epitomizes the great aesthetic movements. It's Eurocentric, and is found all over the world. On the Button is an inventive and unusual exploration of the cultural history of the button, illustrated with a multiplicity of buttons in black and white and colour. It tells tales of a huge variety of the button's forms and functions, its sometimes uncompromising glamour, its stronghold in fashion and literature, its place in the visual arts, its association with crime and death, its tender call to nostalgia and the sentimental.

There have been works addressed to the button collector and general cultural histories. On the Button links the two, revealing why we are so attracted to buttons, and how they punch way above their weight.

Drawing on 25 years' experience as a conservator of leather, Goubitz presents a typological catalogue of footwear dating from 800-1800 AD. The study is based on Goubitz' analysis of an important assemblage of shoes recovered from excavations at Dordrecht in the Netherlands but the volume's aim is to offer guidance for the identification of shoes found on sites across north-western Europe. In addition, contributions from van Driel-Murray and Groenman-van Waateringe examine evidence for shoe types in prehistoric Europe and the north-western provinces of the Roman Empire, periods which inevitably have left less evidence. The fully illustrated catalogue follows a comprehensive discussion of shoes styles and technology including height standards, iconography, material, patterns,

stitches, soles, the identification and dating of fragments and conservation. The volume should prove a useful tool for Roman and, especially, medieval historians and archaeologists.

Although we now have sophisticated algorithms and techniques for determining the shapes and sizes and for matching the fit between shoes and feet, few, if any, of the books currently available cover these new technologies until now. Bringing

together high-quality and state-of-the-art contributions from designers, biomechanists, ergonomists, engineers, podiatrists, and scientists from industry and academia, *The Science of Footwear* provides an in-depth understanding of the technology and techniques involved in the design and development of a popular and demanding consumer product. This book introduces the design, development, manufacturing, and marketing of footwear. The chapters contain data from past research and the state-of-the-art methodologies. They not only cover every aspect of the product design, but also how the footwear industry caters to the wide-ranging needs of sophisticated and demanding customers. The footwear industry has rapidly changed over the last 10 years. Mass production has changed to personalization and mass customization, areas that are not well-understood. This book explores these different concepts in a coherent way, drawing on differing views that give a holistic view of the science behind footwear. Collating information from different disciplines, the book provides the tools to develop the next generation of footwear.

Killer Heels explores the rich cultural history of the high heel and its relation to power, fantasy, sexuality and identity. More than 160 spectacular contemporary and historical shoe designs - from sixteenth-century Venetian platforms to twenty-first-century Christian Louboutins - are presented around six themes: Revival and Reinterpretation, Rising in the East, Glamour and Transgression, Architecture, Metamorphosis and Space Walk. Going beyond the archetypal forms of stiletto, wedge and platform, these extraordinary designs play with the cultural and artistic possibilities of the high heel, use innovative or unexpected materials and push the limits of functionality, wear ability and beauty. Complementing the shoes are stills, sketches and artist statements for six films specially commissioned for the exhibition from Ghada Amer and Reza Farkhondeh, Zach Gold, Steven Klein, Nick Knight, Marilyn Minter and Rashaad Newsome that explore a range of provocative themes and demonstrate the power of the high heel in the collective imagination. In addition, several of the designers included in the exhibition (including Brian Atwood, Zaha Hadid, Pierre Hardy and Christian Louboutin), along with Elizabeth Semmelhack, Curator of the Bata Shoe Museum, contribute thoughts on topics such as their inspiration and design process and the cultural significance of high heels. Beautiful, informative and just plain fun, this collection of killer heels is filled with stunning photos and fashion lore.

delicately beautiful, colorfully playful, and hugely influential fashion illustration work from the 1950s has never before been collected in a book. A pop object in itself, Andy Warhol Fashion is a fun and gorgeous gallery of hundreds of his most delightful images. These witty drawings -- fanciful shoes, chic hats, smart suits, and perfect accessories to match -- showcase his unique ability to find inspiration in the everyday and elevate the ordinary to the extraordinary. Sprinkled with Warhol's perceptively funny observations ("When you think about it, department stores are kind of like museums."), and a reflection on Warhol's influence in the fashion world by Simon Doonan, Andy Warhol Fashion is a must-have acquisition for anyone with style.
