Canon EOS Rebel T1i / 500D Digital Field Guide John Wiley & Sons

The story of Canon begins in Japan in 1937, when four young entrepreneurs - Takeshi Mitarai, Goro Yoshida, Saburo Uchida, and Takeo Maeda - came together to found a new company. They named their company "Precision Optical Instruments Laboratory" and set out to produce high-quality cameras that could compete with the best in the world. At the time, Japan was still a relatively new player in the camera industry, with most of the top brands coming from Europe and the United States. However, the founders of Canon were determined to change this, and they believed that they had the knowledge, skills, and drive to create cameras that could rival those of their competitors. The early days of the company were challenging, as Japan was still recovering from the effects of the Great Depression and the country was on the brink of war. However, the founders of Canon persevered, and they were able to secure funding from a group of investors who believed in their vision. With their funding secured, the founders of Canon set to work creating their first camera. Their first product was a 35mm camera called the Kwanon, named after the Buddhist goddess of mercy. The Kwanon was a revolutionary camera, featuring a high-quality lens and a unique design that set it apart from its competitors. Despite its innovative design, the Kwanon was not an immediate success. However, the founders of Canon remained determined to succeed, and they continued to refine their products and build their reputation. Over time, Canon became known for its high-quality cameras and lenses, and the company grew to become one of the most respected brands in the photography industry. Today, Canon is a household name, with a wide range of products that are used by photographers all over the world. From its humble beginnings in 1937, Canon has grown into a global leader in the field of photography, thanks to the vision and determination of its founders.

Canon EOS 60D Digital Field Guide Cengage Learning In September of 2014, technology giant Canon U.S.A. Inc. announced to the public the release of three new cameras to the Powershot line. Among those announced launch is the Powershot SX60 HS digital camera. The thrust behind the launch of this model, according to the Tech-giant, is the need to continually meet the demand for high quality imaging tools and products. Reviews to date have lauded the company for meeting these demands; purporting that the SX60 HS camera is packed with features to guarantee an optimized photo experience for both professional and amateur users. Among the features of the new Powershot SX60 HS camera is the sixteen (16) megapixel ½.3 inch BSI-CMOS sensor, Optical Image Stabilizer, fully articulated three (3) inch LCD monitor, Electronic Viewfinder with 100% coverage available, external and built-in flash, a Self-timer feature and continuous drive of approximately 6.4 frames per second.
