### **High Resolution Print Screen**

---

The print out of a PDF, and whatever images, or fonts, are scaled for that medium. If your printer can print out at 300 dpi (Dots Per Inch), which is actually a low resolution for a printer (many even "cheapo" printers can easily print at 600 or even 1200 dpi) but that is SO MUCH higher than what your video screen is.

high resolution Definition

from PC Magazine

Encyclopedia

Print Resolution Printing resolution, on the other hand, is a completely different animal. Because you're going for photo quality when printing images it is necessary to print off at a much higher dpi. While the eye generally can't differentiate above 200 dpi it's still recommended that you use 300 dpi images for maximum crispness.
