The Guide to Literary Terms (MAXNotes Literature Guides) Houghton Mifflin Harcourt

This book explores evidence-based practice in college science teaching. It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's (2014) challenge seriously, and to investigate claims about the efficacy of alternative strategies in college science teaching. In editing this book, we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence, and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines. Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence. Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges, 4-year liberal arts institutions, comprehensive regional campuses, and flagship research universities. In keeping with Wieman's challenge, our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences. The content is structured as follows: after an Introduction based on Constructivist Learning Theory (Section I), the practices we explore are Eliciting Ideas and Encouraging Reflection (Section II); Using Clickers to Engage Students (Section III); Supporting Peer Interaction through Small Group Activities (Section IV); Restructuring Curriculum and Instruction (Section V);

Rethinking the Physical Environment (Section VI); Enhancing Understanding with Technology (Section VII), and Assessing Understanding (Section VIII). The book's final section (IX) is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses. The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events. Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years. In this view, learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base. For most students, that knowledge base is riddled with a host of naïve notions, misconceptions and alternative conceptions they have acquired throughout their lives. To a considerable extent, the job of the teacher is to coax out these ideas; to help students understand how their ideas differ from the scientifically accepted view; to assist as students restructure and reconcile their newly acquired knowledge; and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances. Clearly, this prescription demands far more than most college and university scientists have been prepared for.

*CLEP Introductory Business Law* Courier Corporation  
The second edition of *Psychology Research Methods: How to Think About and Write About Research* by Wendy Heath engages students with compelling studies relevant to students' lives, but in a research methods context. By looking underneath the conclusions of these studies to determine which methods they use, students discover the relevance and importance of research methods. Heath also focuses on writing about research methods by presenting examples from across psychology literature as well as writing exercises at the end of each chapter. These features help students complete their research papers with confidence while gaining a greater understanding of research methods through writing. Coverage of descriptive, experimental, quasi-experimental, small-N design, and qualitative methods in psychology give students a broad overview of all methods in this clear text.

A valuable study aid for students taking upper-level mathematics courses. Fully indexed for locating specific problems rapidly.

Algebra & Trigonometry I Essentials McGraw Hill Professional  
Praise for *Overloaded and Underprepared* "Parents, teachers, and administrators are all concerned that America's kids are stressed out, checked out, or both—but many have no idea where to begin when it comes to solving the problem. That's why the work of *Challenge Success* is so urgent. It has created a model for creating change in our schools that is based on research and solid foundational principles like communication, creativity, and compassion. If your community wants to build better schools and a brighter future, this book is the place to start." —Daniel H. Pink, author of *Drive* and *A Whole New Mind* "*Challenge Success* synthesizes the research on effective school practices and offers concrete tools and strategies that educators and parents can use immediately to make a difference in their communities. By focusing on the day-to-day necessities of a healthy schedule; an engaging, personalized, and rigorous curriculum; and a caring climate, this book is an invaluable resource for school leaders, teachers, parents, and students to help them design learning communities where every student feels a sense of belonging, purpose, and motivation to learn the skills necessary to succeed now and in the future." —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University "Finally, a book about education and student well-being that is both research-based and eminently readable. With all the worry about student stress and academic engagement, Pope, Brown and Miles gently remind us that there is much we already know about how to create better schools and healthier kids. Citing evidence-based 'best practices' gleaned from years of work with schools across the country, they show us what is not working, but more importantly, what we need to do to fix things. Filled with practical suggestions and exercises that can be implemented easily,

as well as advice on how to approach long-term change, *Overloaded and Underprepared* is a clear and compelling roadmap for teachers, school administrators and parents who believe that we owe our children a better education." —Madeline Levine, co-founder *Challenge Success*; author of *The Price of Privilege* and *Teach Your Children Well* "This new book from the leaders behind *Challenge Success* provides a thorough and balanced exploration of the structural challenges facing students, parents, educators, and administrators in our primary and secondary schools today. The authors' unique approach of sharing proven strategies that enable students to thrive, while recognizing that the most effective solutions are tailored on a school-by-school basis, makes for a valuable handbook for anyone seeking to better understand the many complex dimensions at work in a successful learning environment."

Practice for the Regents exam right now, instantly, conveniently, efficiently and effectively with *Chemistry Regents Exam on PowerPoint*. The entire January 2017 Biology Regents - Living Environment Exam transformed into a spectacular PowerPoint slide, with answers right after each question, and Reference Tables when needed. With this resource, teachers and students will have a powerful resource that will make Regents practice ? convenient ? effective ? efficient ? engaging ? exciting ? time-saver, and ? lead to higher Regents grades NOTE: This Google Play Book version is not interactive because it is not on PowerPoint. The interactive PowerPoint version can be downloaded from: <https://www.teacherspayteachers.com/Store/E3-Scholastic/Search:Regents+powerpoint+spectacular> This Google Play version of the Regents exam is great for practicing anytime and anywhere without the need for your book and reference table. It's all on the slides. This has never been done before, and there's no resource like it out there. Be the first in your school to use this for your Regents prep. I created this product originally on PowerPoint because I was frustrated with using pdf download of the exams to review with my students. Here are some key features that make this resource on PowerPoint a much better alternative to just using pdf. 1. Each Regents Question on an Individual Slide. 2. All Information, Table, Diagram, and/or Graph of a Question Are on the Same Screen. 3. Correct Multiple-Choice Answer or Acceptable Constructed Response Answers to a Question is Revealed with Just a Click or Touch. 4. Spectacular Background Images and Flashy Borders. 5. Beautiful Cinematic Wide Screen View on Media Projectors and Mobile Devices. I will have Regents on PowerPoint available for the following exams: Biology: August 2017, June 2017, January 2017, August 2016 and June 2016 Chemistry: August 2017, June 2017, January 2017, August 2016 and June 2016 Earth science: August 2017, June 2017, January 2017, August 2016 and June 2016 Please leave me your rating and comment. Thanks.
