Springer Nature
This book comprises select

peer-reviewed papers presented at the International Conference on Sustainable Development through Engineering Innovations (SDEI) 2020. It presents recent advances, new directions, and opportunities for sustainable and resilient approaches to design and protect the built-environment

through engineering innovations & interventions. The topics covered are highly diverse and include all civil engineering and construction-related aspects such as construction and environmental Issues, durability and survivability under extreme conditions, design of new materials for sustainability, eco-efficient and ultra-high performance cementitious materials, embedded structural and foundation systems and environmental geomechanics. The book will be of potential interest to the researchers and students in the fields of civil engineering, architecture and sustainable development.

The G?tagovinda of Jayadeva Disha

Publications

Covers different categories of green technologies (e.g. biofuels, renewable energy

sources, phytoremediation etc.) in a nutshell -Focuses on next generation technologies which will help to attain the sustainable development -The chapters widely cover for students, faculties and researchers in the scientific arena of Environmentalists, Agriculturalists, Engineers and Policy Makers The World Environment Day 2012 is prepared to embrace green economy. The theme for 2012 encompasses various aspects of human living, ranging from transport to energy to food to sustainable livelihood. Green technology, an eco-friendly clean technology contributes to sustainable development to conserve the natural resources and environment which will meet the demands of the present and future generations. The proposed book mainly

focuses on renewable energy sources, organic farming practices, phyto/bioremediation of contaminants, biofuels, green buildings and green chemistry. All of these eco-friendly technologies will help to reduce the amount of waste and pollution and enhance the nation's economic growth in a sustainable manner. This book is aimed to provide an integrated approach to sustainable environment and it will be of interest not only to environmentalists but also to agriculturists, soil scientists and bridge the gap between the scientists and policy-makers.

FUNCTIONAL

COATINGS A must-own resource for understanding functional coatings and their revolutionary potential
Functional coatings are those which provide not only the protection and performance enhancement of a conventional coating, but also offer additional properties tailored to meet the specific requirements of a given industry or application. They have applications in a huge range of sectors, including automotive, aerospace, healthcare, energy, and more. Coatings with properties like fire retardancy, antimicrobial properties, or controlled drug release have the

potential to revolutionize entire industries. Functional Coatings offers a comprehensive resource for engineers and researchers looking to understand these coatings and the opportunities they provide. Beginning with an overview of the subject's foundations and industrial significance, the book analyzes numerous coating methods and their properties, with a particular focus on anticorrosion coatings. The result is an indispensable resource for professionals in virtually any technological industry looking to understand the benefits of a cutting-edge toolkit. Functional Coatings readers will also find: Coverage of synthesis, durability, reproducibility, cost-effectiveness, specialized surface morphology, and environmental friendliness of

each coating Detailed discussion of antimicrobial coatings, fire-retardant coatings, self-healing coatings, nanopowder coatings, coatings for marine applications, and many more Applications of additives, machine learning, and sophisticated characterizations, etc. as per industry requirements Functional Coatings is ideal for researchers, engineers, and industry professionals working with any area of technology where coatings have purchase.

The new edition of the book "Child Development & Pedagogy for CTET & STET" has been updated with past CTET papers upto 2016 (September). Further some past

papers of various State TETs have also been added. The book provides an exclusive treatment to the subject with special emphasis upon Child Development, Inclusive Education, Learning and the Pedagogical Issues. The book has been divided into 10 chapters. For each chapter an exhaustive theory has been provided which covers the complete syllabus as prescribed by the CBSE/ NCERT/ NCF 2005. This is followed by 2 set of exercises. The exercise 1 contains a set of MCQs from the PREVIOUS YEAR Question Papers of CTET and various STET's. The exercise 2, "TEST YOURSELF" provides carefully selected MCQs for practice. The book is a must for all the candidates appearing in the Paper 1 and 2 of the CTET and all State TETs. *Asian Recorder* Gyan Publishing House

In today's situation the security and safety of our countrymen is not only into the hands of Indian army and state police but also forces known as Paramilitary Forces. The security of Indian borders and internal matters are being looked after by these brave men working in these

Paramilitary Forces including their history, origin, organization, duties and functions, role and future. It also examines the role of these forces in counter-insurgency and also international peacekeeping under UN. Covering all paramilitary organizations of India, this volume provides valuable information to students, researchers and laymen. An excellent book, which will serve as a sound and lively introduction for all, and also will, makes an impressive

and substantial contribution to study of Paramilitary Forces of India.

Subaltern Urbanisation in India Eapublication Arihant has come up with a revised edition of a compendium of over 14000 questions which will significantly improve the knowledge of aspiring students by providing them with ready and reliable practice material for General Studies. Mainstreaming Biodiversity for Sustainable Development Jaypee Brothers, Medical Publishers Pvt. Limited

?This volume decentres the view of urbanisation in India from large agglomerations towards smaller urban settlements. It presents the outcomes of original research

conducted over three years on subaltern processes of urbanization. The volume is organised in four sections. A first one deals with urbanisation dynamics and systems of cities with chapters on the new census towns, demographic and economic trajectories of cities and employment transformation. The interrelations of land transformation, social and cultural changes form the topic of the "land, society, belonging" section based on ethnographic work in various parts of India (Karnataka, Himachal Pradesh, Arunachal Pradesh and Tamil Nadu). A third section focuses on public policies, governance and urban services with a set of macro-analysis based

papers and specific case studies. Understanding the nature of production and innovation in non-metropolitan contexts closes this volume. Finally, though focused on India, this research raises larger questions with regard to the study of urbanisation and development worldwide.
