This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

This book takes a completely new look at the Anthroposophical Soul Calendar. It is about the deeper meaning of the fifty-two weekly verses, which has remained essentially unexplored in the last hundred years since the first edition by Rudolf Steiner. A dense veil of Isis was spread over them, of which is well known that no mortal person can lift it. Only the immortal, psycho-spiritual human being, who knows himself at home in the extrasensory, higher worlds, is capable of doing this. Only to him the weekly verses reveal themselves as a travel guide through these worlds and lift him up to ever higher spiritual-cosmic realms until he reaches the experience of God, from where he gradually descends again into a new life on Earth, enriched in spirit and fertilized in his soul. If the reader embarks on this journey, the spiritual archetype of the Soul Calendar is ultimately unveiled to him and he achieves an extended understanding of Man and Christ. By many quotations from Rudolf Steiner's lectures and books, the author virtually lets Steiners himself elucidate the breathtaking depths of his mysterious weekly verses.

Know When Drugs Are Necessary, When Alternatives Are Better and When to Let Your Body Heal on Its Own CarTech Inc

Too many Americans are taking too many drugs -- and it's costing us our health, happiness, and lives. Prescription drug use in America has increased tenfold in the past 50 years, and over-the-counter drug use has risen just as dramatically. In addition to the dozens of medications we take to treat serious illnesses, we take drugs to help us sleep, to keep us awake, to keep our noses from running, our backs from aching, and our minds from racing. Name a symptom, there's a pill to suppress it. Modern drugs can be miraculously life-saving, and many illnesses demand their use. But what happens when our reliance on powerful pharmaceuticals blinds us to their risks? Painful side effects and dependency are common, and adverse drug reactions are America's fourth leading cause of death. In *Mind over Meds*, bestselling author Dr. Andrew Weil alerts readers to the problem of overmedication, and outlines when medicine is necessary, and when it is not. Dr. Weil examines how we came to be so drastically overmedicated, presents science that proves drugs aren't always the best option, and provides reliable integrative medicine approaches to treating common ailments like high blood pressure, allergies, depression, and even the common cold. With case histories, healthy alternative treatments, and input from other leading physicians, *Mind over Meds* is the go-to resource for anyone who is sick and tired of being sick and tired.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
