What did America's greatest orators say regarding significant issues and concerns throughout United States history? This three-volume set examines hundreds of the most historically significant speeches from colonial times to the modern era, allowing readers to consider exactly what the speakers said—and to better understand the motivations behind each speech as well as the effect on the audiences that heard them. Bush responding to the attacks of September 11. For students, teachers, librarians, and general readers, this indispensable work provides essential reference resources on the speeches of great significance in American history. Each speech is prefaced by a contextual headnote that provides essential background information and specific details about the speech. There has been a resurgence of interest in Kipling among critics who struggle to reconcile the multiple pleasures offered by his fiction with the controversial political ideas that inform it. Peter Havholm takes up the challenge, piecing together Kipling's understanding of empire and humanity from evidence in Anglo-Indian and Indian newspapers of the 1870s and 1880s and offering a new explanation for Kipling's post-1891 turn to fantasy and stories written to be enjoyed by children. By dovetailing detailed contextual knowledge of British India with informed and sensitive close readings of well-known works like 'The Man Who Would Be King', 'Kim', 'The Light That Failed', and 'They', Havholm offers a fresh reading of Kipling's early and late stories that acknowledges Kipling's achievement as a writer and illuminates the seductive allure of the imperialist fantasy.

Psychoanalytic Terms and Concepts Bloomsbury Publishing USA

Winner of the 2005 Goethe Award in Psychoanalytic Scholarship The central argument of *On Being Normal and Other Disorders* is that psychic identity is acquired through one's primary intersubjective relationships. Thus, the diagnosis of potential pathologies must also be founded on this relation. Given that the efficacy of all forms of treatment depends upon the therapeutic relation, a diagnostic of this sort has wide-ranging applications. Paul Verhaeghe's critical evaluation of the contemporary DSM-diagnostic shows that the lack of reference to an updated governing metapsychology impinges on the therapeutic value of the DSM categories. In response to this problem, the author sketches out the foundations of such a metapsychology by combining a Freud-Lacanian approach with contemporary empirical research. Close attention is paid to the processes of identity acquisition to show how the self and the Other are not two separate entities. Rather, subject formation is seen as a process in which both the subject's and the Other's identity, as well as the relationship between them, comes into being. By engaging this new theoretical approach in a constant dialogue with the findings of contemporary research, this book provides a compass for the practical applications of such a differential diagnostic. Post-modern categories of anxiety disorders, personality disorders, and post-traumatic stress disorders are approached both through the well-known neurotic, psychotic, and perverse structures, as well as through the less familiar distinction between an actual pathology and a psychopathology. These two outlooks, which involve the role of language and the subject's relation to the Other, are spelled out to show their

implications for treatment at every turn.

A specific form of understanding of evil, in the problem of evil debate, gets assumed among a variety of materialistic naturalists. Owing to their physicalist and, in some cases, behaviorist philosophies, this understanding assumes a hedonistic view of pain that reduces valuation to pleasure and pain. Herein, all forms of good and evil get reduced to pleasure and pain. This work reorients the debate toward a more biblical understanding of evil based on an essentialist reading of ethics. The book argues that the hedonistic understanding of value characterizing prominent naturalistic materialists, such as those alluded to by J. L. Mackie, semantically seems to entail either a synonymous or a near synonymous relationship between evil and pain. The book further argues that this understanding, given the essentialist reading of ethics, seems wrongheaded. By reorienting the contours of the debate, it suggests that the problem of pain might, in effect, be quite different from the problem of evil and that neither problem necessarily entails the other. Seen in this way, neither problem casts doubt on belief in God's existence.

An Introduction to Ethics Crossway

The five sermons of Jonathan Edwards chosen for this edition have shown enduring popularity. "A Divine and Supernatural Light" contrasts having an intellectual knowledge against having a supernatural experiential knowledge

of God. "The Justice of God and the Damnation of Sinners" is a discourse on why it is just for God to render a harsh judgment. "The Excellency of Christ" clarifies the almost contradictory conjunctions of Christ, such as being a lion and a lamb. "Heaven, a World of Love" shows the glories of heaven and discusses the objects, subjects, and circumstances of love in heaven. "Sinners in the Hands of an Angry God," the best known of Jonathan Edwards' sermons, promotes the seriousness of sin and the mercy of God as the only way to stay out of hell.

Sigmund Freud can be a polarizing figure, beloved by many and despised by some. Focusing on eight key writers and scholars who either passionately loved or gleefully loathed Freud, this book represents Freud's wide legacy, the reach of his ideas, their controversies, and their ability still to provoke, inspire, confound, outrage, and compel. The book begins by focusing on four highly prolific authors whose admiration for Freud is boundless: Lionel Trilling, Harold Bloom, Kurt R. Eissler, and Peter Gay. Berman then explores four more writers whose aim was not simply to debunk Freud and destroy his monstrous creation but to cast both into hell: D. H. Lawrence, Vladimir Nabokov, Thomas Szasz, and Frederick Crews. Each chapter discusses the author's involvement with Freud, exploring the continuities and discontinuities of his or her writings, as well as offering snapshots of the writers, suggesting how their personal and professional lives were inextricably related. Berman draws out some surprising commonalities between the Freudolaters and Schadenfreudians, going on to discuss the current state of psychoanalysis and the "psychoanalytic credos" by which contemporary analysts live.

Socrates' life, as revealed in Plato's dialogues, is defined by a twofold ambition. On one hand, he scrutinizes people's beliefs, including his own, with the aim of exposing inconsistencies and learning about the human excellences. On the other hand, Socrates attempts to persuade particular individuals that the life of virtue and justice is far superior to the life of injustice.

Curtis A. Johnson, by focusing specifically on the dialogues with the "immoralists" Polus, Callicles, and Thrasymachus, illuminates the complexities of Socrates' thought, showing the complicated interplay of the seemingly contradictory parts of Socrates' ambition, ultimately vindicating the overall coherence of the views. Socrates and the Immoralists assembles an in-depth exploration of Socrates' argument for the just life, important for scholars of Socrates, Plato, and Greek philosophy in general.
