If Kids Could Vote Wolters Kluwer
New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, An Indigenous Peoples' History of the United States is an essential resource providing historical threads that are crucial for understanding the present. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows

how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. An Indigenous Peoples' History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (Lupita Nyong'o, Time), "poignant" (Entertainment Weekly), "soul-nourishing" (USA Today) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's

tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconditional, unconditional love.

Geography Education in Japan Pearson UK

In a globalized market where the emerging workforce will increasingly travel within their nations and abroad for work

opportunities, it is valuable to learn about the international education system and practices, to assess the competition. For example, annual comparison of student performance is measured across math and science subjects globally. What is not well known is how geography educational systems compare around the world and how student success in this subject translates to learning in other courses or employment after graduation. The importance of geography in our personal, professional, and civic lives is transparent when one considers how finding one's way with a map, understanding of world cultures, or identifying spatial patterns of disease spread might influence the decisions we make. Written for a global audience, this is the first English publication on geography education in Japan, addressing some fundamental questions. What is the nature of the geography educational systems in Japan? How does the focus on content and skills in Japanese schools differ from that in other countries? This book includes 25 authors from diverse geography instruction and research experiences, making it an authoritative publication on Japan's geography education system. The contribution of this book to the larger geography educational community is sharing the key strengths, concerns, and future of this school subject in English, where previously most publications were in Japanese. It will be a useful source for researchers and teachers to understand Japan's evolving geography instruction in the past, present, and future. The 21 chapters are organized into themes, beginning with an overview of the geography education system in Japan, followed by chapters that deal with regional geography and fieldwork, teacher training, geography education's contributions to society, and a comparative study of geography education across multiple countries. The book ends with a vision of geography education in the future.

AMER STORY VOL 1 SET Scholastic Inc.

"An artfully told story . . . The history, the land, and the determination of a band of refugees to care for each other are vividly evoked in this important work." -- Starred review, Kirkus Reviews
In the dry spring of 1999, eleven-year-old Stephen Majok watches as his friend Wol joins a circle of dancers. Wol is celebrating – only fourteen, he is engaged to Stephen's sister. Wol wants to marry because he might join the guerrillas in southern Sudan and fight the northern government soldiers. He wants a wife to remember him. Stephen thinks Wol is crazy. Children should study. But because of the civil war, there has been no school in their village for over a year. All Stephen has left from his student days is his books and one precious pencil, and the hunger for knowledge. Then, suddenly – but not unexpectedly – exploding bombs are heard in the tiny village. Stephen's mother tells him to hurry, pack his bag, and hide beyond the forest with Wol and their friend Deng. Stephen grabs his geography book, his pencil, and little else. He does not want to leave his mother and sister. He does not want to leave the life he loves. In her latest portrayal of "children caught in the cultural crossfire" (School Library Journal), Alice Mead emphasizes the attachment all humans have to the small place on earth we call home, and our resistance to being displaced, even when our very lives are threatened.

The First Book of Moses, Called Genesis The Pennsylvania Journey
Preparing children to become citizens of a democracy requires recognition of the different ways in which children learn about politics. Kids in the United States currently spend most of their lives in controlled situations such as schools where the dependency they experience in their homes is reinforced. Besides teachers -- books, films, television, and video games influence how children think about democracy. Interviews and surveys of children during three Presidential elections and two non-Presidential years show how some sixth-graders in a Vermont town react to the political issues raised in those elections. Besides presenting the children's voices, Sugarman also examines some aspects of the media and of the school situation to see how they effect the children's thinking. Changes that might improve the children's understanding and knowledge of democracy are also suggested. This book should be of interest to parents, teachers, those involved in media literacy, popular culture, and child development.
