Your students may recognize words like determine, analyze, and distinguish, but do they understand these words well enough to quickly and completely answer a standardized test question? For example, can they respond to a question that says "determine the point of view of John Adams in his Letter on Thomas Jefferson" and analyze how he distinguishes his position from an alternative approach articulated by Thomas Jefferson"? Students from kindergarten to 12th grade can learn to compare and contrast, to describe and explain, if they are taught these words explicitly. Marilee Sprenger has curated a list of the critical words students must know to be successful with the Common Core State Standards and any other standardized assessment they encounter. Fun strategies such as jingles, movements, and graphic organizers will engage students and make learning these critical words enjoyable and effective. Learning the critical vocabulary will help your students with testing and college and career readiness, and will equip them with confidence in reading, writing, and speaking. Marilee Sprenger is also the author of *How to Teach So Students Remember*, *Learning and Memory*, and *Brain-Based Teaching in the Digital Age*.

Follows California's efforts at reforming the public school system from 1983 to the present.  
*Constructing Modern Asian Citizenship* IAP  
*Reading Across International Boundaries*, edited by Roger Openshaw and Janet Soler, clearly demonstrates these broader characteristics of debates about the teaching of reading. It sets the educational issues firmly in the context of the social, cultural and political dynamics that inform and animate them and give them their meaning. It does so by setting out to understand their historical and comparative dimensions. Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar. The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world. More than this, however, this collection takes us into the realm of international influences. It underlines how debates in this area are not simply national, but are international and global in their scale. Moreover this is the case not only in relation to the broad fabric of policy debate, but also in the everyday struggles of pupils, parents and teachers in schools, classrooms and homes. Such an agenda is unsettling and provocative. It has the potential to challenge received opinion, to hustle preconceptions. It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in different localities or even more broadly. Most of all, it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed. This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field, but also a major resource when put to good use by policy makers and practitioners, as it should surely be.
