Learning to work effectively and efficiently in a group is an important part of learning to be a substantive contributor in today's business environment. Teams: A Competency Based Approach provides a solid coverage of the underlying theory of teamwork, complemented by examples, to help students learn and practice the competencies that will allow them to take advantage of team-building opportunities. This book helps readers to systematically identify, analyze and manage issues that arise as a result of teamwork by emphasizing four important objectives for successful team-members: Recognizing opportunities for accomplishing goals within a team context Appreciating other individuals' attributes in a group setting Analyzing the types of environments in which teamwork is most advantageous Identifying and building the necessary competencies to leverage successful group experiences With exercises and activities designed to allow readers to engage with the material and build specific team-oriented competencies, this book offers undergraduate students interested in management, team building, and human resource training the tools needed for successful group experiences.

No single nation, culture or religion can achieve peace and security at home while ignoring the terrorist threats posed to others

globally. This book presents lectures and a keynote speech delivered as part of the NATO Advanced Training Course (ATC) Countering ISIS Radicalisation in the Region of South-East Europe (CIRACRESEE), held in Ohrid, Republic of Macedonia, in April 2017. The main objective of the five-day ATC was to provide participants from the integrated security sector with information and knowledge about global trends with regard to the uses of cyberspace by ISIS, as well as accentuating the importance of the resulting social and technological challenges. An in-depth analysis of how these trends are influencing the region was also performed. The course topic was addressed from strategic/political, legal and technical perspectives, and participants were engaged in creating future regional policy proposals to counter ISIS use of cyberspace by engaging political, strategic, legal and technical components. The 12 selected lectures presented here provide readers with a comprehensive analysis from a socio-cultural, organizational and technological perspective. Among the authors are well-known academics and security professionals with internationally proven expertise in their areas of work, and the book will be of interest to all those working in the field of counter-terrorism.
