The classic, groundbreaking analysis of the role of race in the classroom and a guide for teaching across difference, from the MacArthur award-winning educator “Phenomenal. . . . [This book] overcomes fear and speaks of truths, truths that otherwise have no voice.” —San Francisco Review of Books In this groundbreaking, radical analysis of contemporary classrooms, MacArthur award-winning author Lisa Delpit develops the theory that teachers must be effective “cultural transmitters” in the classroom, where prejudice, stereotypes, and assumptions often breed ineffective education. Delpit suggests that many academic problems attributed to children of color are actually the result of miscommunication, as primarily white teachers educate “other people’s children” and perpetuate the imbalanced power dynamics that plague our system. Now a classic of educational thought and a must-read for teachers, administrators, and parents striving to improve the quality of America’s education system, *Other People’s Children* has sold over 250,000 copies since its original publication. Winner of an American Educational Studies Association Critics’ Choice Award and Choice magazine’s Outstanding Academic Book Award, this anniversary edition features a new introduction by Delpit as well as important framing essays by Herbert Kohl and Charles Payne.

With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world—from social problems like depression and obesity to global issues like poverty and climate change—and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. Written for gamers and non-gamers alike, *Reality Is Broken* shows that the future will belong to those who can understand, design, and play games. The achievement gap is a persistent and perplexing challenge for educators. While school- and system-level reforms continue to be discussed in statehouses and district offices, individual teachers are challenged to do something now to help students who are falling short of standards, including students who are English language learners and receiving special education services. A companion to the ASCD best-seller *Improving Student Learning One Teacher at a Time*, this book identifies small, specific adjustments to planning, teaching, and assessment practices that will support more effective learning in every student, every day, and help close the achievement gap on a classroom-by-classroom basis. Here, you'll learn how to * Use readily available tools--curriculum documents, a plan book, and a grade book--to improve all students' access to, interaction with, and mastery of lesson content. * Design daily lessons that clarify learning goals and require students to use high-yield learning strategies, seek feedback, and reflect on their progress. * Promote the progress of English language learners through coordinated pursuit of content and language goals, and synchronize instruction to improve the performance of special education students in both co-

teaching and resource environments. This book also features the voices of working educators who share how "minding the gap" has helped them engage academically at-risk students, ELLs, and special education students; improve students' test scores; and sustain these gains over time. If you are a classroom teacher or specialist committed to helping all your students become more successful learners and unwilling to wait for high-level solutions or even the results of another "data retreat," then this is just the resource you need.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on

system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
