Hosts of the podcast Stuff They Don't Want You to Know, Ben Bowlin, Matthew Frederick, & Noel Brown discern conspiracy fact from fiction regarding "stuff" the government doesn't want you to know. Conspiracies didn't always seem so clear and present. It used to be that people with tin-foil hats who were convinced of secret messages coming through the radio were easily disregarded as kooks and looney tunes. But these days, conspiracies feel alive and well. From internet rumors to lying politicians to the tinderbox that is social media, it's become remarkably clear that a vast swath of people believe really bonkers things. Why is that? How did these theories proliferate? Is there a kernel of truth to it or are they fully fiction? Ben Bowlin, Matt Frederick, and Noel Brown are the hosts of the popular iHeart podcast that seeks to answer these questions. With cool heads and extensive research, they regularly break down the wildest conspiracy theories: from chemtrails and biological testing to the secrets of lobbying and why the Kennedy assassination is of perennial interest. Written in smart, witty, and conversational style, and with amazing illustrations, Stuff They Don't Want You to Know is a vital book in helping to understand the unexplainable and use truth

as a powerful weapon against ignorance, misinformation, and lies.

The Seven Wonders of the Ancient World, and all sorts of mysteries attaching to them, have intrigued people since the second century BCE. Why were these particular creations chosen and when? And why did the ancients want to draw up such a list in the first place? What were the technical and cultural factors involved in the creation and listing of the Wonders? The Seven Wonders still rival many of the phenomenal products of both nature and mankind in their size, majesty, and beauty. Six of them no longer stand, having been destroyed by natural disaster or by human intervention. From the Pyramids at Giza to the Colossus of Rhodes, from the Hanging Gardens of Babylon to the Lighthouse of Alexandria, from the Temple of Ephesus to the Mausoleum at Halicarnassus and the Statue of Zeus at Olympia, the Seven Wonders of the Ancient World have never ceased to fascinate down the ages.

'An epic treasure hunt into the highways and byways of stored knowledge across faiths and continents.' John Agard, poet and playwright
In *The Map of Knowledge* Violet Moller traces the journey taken by the ideas of three of the greatest scientists of antiquity - Euclid, Galen and Ptolemy - through seven cities and over a thousand years. In it, we follow them from sixth-century Alexandria to ninth-century Baghdad, from Muslim Cordoba to Catholic Toledo, from Salerno's medieval medical school to Palermo, capital of Sicily's vibrant mix of cultures, and - finally - to Venice, where that great merchant city's printing presses would enable Euclid's geometry, Ptolemy's system of the stars and Galen's vast body of writings on medicine to spread even more widely. In tracing these fragile strands of knowledge from century to century, from east to west and north to south, Moller also reveals the web of connections between the Islamic world and Christendom, connections that would both preserve and transform astronomy, mathematics and medicine from the early Middle Ages to the Renaissance. Vividly told and with a dazzling cast of characters, *The Map of Knowledge* is an evocative, nuanced and vibrant account of our common intellectual heritage.

How Classical Ideas Were Lost and Found: a History in Seven Cities Answers in Genesis

A lively and engaging narrative history showing the common threads in the cultures that gave birth to our own. This is the first volume in a bold new series that tells the stories of all peoples, connecting historical events from Europe to the Middle East to the far coast of China, while still giving weight to the characteristics of each country. Susan Wise Bauer provides both sweeping scope and vivid attention to the individual lives that give flesh to abstract assertions about human history. Dozens of maps provide a clear geography of great events, while timelines give the reader an ongoing sense of the passage of years and cultural interconnection. This old-fashioned narrative history employs the methods of "history from beneath"—literature, epic traditions, private letters and accounts—to connect kings and leaders with the lives of those they ruled. The result is an engrossing tapestry of human behavior from which we may draw conclusions about the direction of world events and the causes behind them.

The role of the Shanghai Cooperation Organization (SCO) in regional politics and the significance of the organization for U.S. interests are widely misunderstood. The organization is emphatically not a military bloc, and yet engages in joint activities which resemble military

cooperation to U.S. eyes. It is, in theory, open to new members; but at present is highly unlikely to accept any. Its rhetoric firmly opposes U.S. presence and activity on the territory of member states, and yet individual member states leverage basing agreements with the U.S. to their advantage. The author reviews SCO's history and stated aspirations, and measures these against actual achievements. He concludes that, with the notable exception of the Regional Anti-Terrorist Structure(RATS), the great majority of SCO accomplishments are of little significance other than to provide an additional multinational vehicle through which China and in particular Russia can seek to counter U.S. and Western activity in Central Asia.

Cuneiform Texts and the Writing of History discusses how the abundant Mesopotamian cuneiform text sources can be used for the study of various aspects of history: political, social, economic and gender. Marc Van De Mieroop provides a student-friendly introduction to the subject and: * criticises disciplinary methodologies which are often informed by a desire to write a history of events * scrutinises the intellectual background of historical writings * examines how Mesopotamia's position as the 'other' in Classical and Biblical writings has influenced scholarship * illustrates approaches with examples taken from the entirety of Mesopotamian history.
