The San Francisco Bay Area is loaded with fascinating and unique historical sites that represent a broad range of historical events and eras. A resident of the Bay Area or a tourist in town for a few days can see a wide range of historical sites all within a day's drive of San Francisco. This book may also be useful for a teacher or parent who is looking for an educational field trip which ties in with the child's curriculum in a history, literature, or science class. Others may find it interesting to learn more about the Native Americans or pioneer settlers in a local community. So, whether you are just curious about what is inside that old historical house in your neighborhood, want to know how a specific historical event played out in your area, or are just looking for an interesting day trip, this book has something for you. Many people are familiar with the more famous sites in California. It is not uncommon to see tourists make a trip to see all of the California missions or Gold Rush towns, but there are also scores of lesser-known sites within the Bay Area that highlight a particular historical event or offer a comprehensive overview of the history of that town or region. More than just a tour guide, the book is broken into sections with essays that acquaint the reader with the history that is covered by the representative museums or sites.

DiGiacomo goes beyond the traditional city, county, state, and national museums and historic sites that feature famous people, historic homes and events. He also covers museums devoted to agriculture, business, Hispanic California, immigration, military posts, mining, Native Americans, transportation, sports, as well as science and technology. He thoughtfully includes key information on each museum such as its location, web address, hours of operation, cost, and what a visitor can expect to encounter. Over 220 historical sites are listed.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

History is not a mere chronicle of facts, but a dialogue between competing interpretations of the past; it should be taught as such. Teaching history in this way makes it both intellectually demanding and more interesting, while at the same time helps students acquire the knowledge and skills necessary to become functioning citizens in a democracy. The opening chapters provide the rationale for the study of history, its epistemological basis, and the logic of the discipline. The bulk of the book deals with practical ways to help students acquire, process, and apply information. In particular, it addresses the specific thinking skills required by the discipline, with many effective techniques for helping students to master them. The implications of this approach for teacher evaluation of student work are also addressed.

The issue, edited by Marina Parente and Carla Sedini, founder of D4T - Design for Territories

Research Network of Politecnico di Milano, aims to contribute to this new field of study helping readers understand the design-led phenomenon, which involves the tangible resources of a territory (like monumental and landscape heritage) as well as the intangible ones (like cultural identity and people values). The main topic of this issue is: How could the design develop the local dimension enhancing and revitalizing the territory at the same time? Furthermore, with issue #13 we are opening a series with artists ’ images that will match the articles with a visual research connected to the proposed subject. Photographer Carla Sadini, co-editor with Marina Parente of this issue, gave us permission to publish a selection of images about “ design that is not there ” , “ design that may be ” and “ tacit design ” within urban territories around the world. We hope that many creatives will interpret the “ Suggestions for Design ” launched here. The numerous contributors to this issue are: Miriam Bicocca; Letizia Bollini; Marco Borsotti & Sonia Pistidda; Raffaella Fagnoni & Silvia Pericu; Davide Fassi, Laura Galluzzo & Anna Linda De Rosa; Rosanna Gaddi; Helena Gentili & Daria Casciani; Jos é Luis Gonz á lez Cabrero, Ana Margarita Avila Ochoa, Ana Calvera, Debora Giorgi, Yosser Halloul, Insaf Khaled & Rosa Povedano; Maria Antonietta Sbordone; Reham Mohsen & Andreas Sicklinger; Carla Sadini & Luca Fois.
