This comprehensive reference guide reviews the literature concerning the impact of the automobile on American social, economic, and political history. Covering the complete history of the automobile to date, twelve chapters of bibliographic essays describe the important works in a series of related topics and provide broad thematic contexts. This work includes general histories of the automobile, the industry it spawned and labor-management relations, as well as biographies of famous automotive personalities. Focusing on books concerned with various social aspects, chapters discuss such issues as the car's influence on family life, youth, women, the elderly, minorities, literature, and leisure and recreation. Berger has also included works that investigate the government's role in aiding and regulating the automobile, with sections on roads and highways, safety, and pollution. The guide concludes with an overview of reference works and periodicals in the field and a description of selected research collections. The Automobile in American History and Culture provides a resource with which to examine the entire field and its structure. Popular culture scholars and enthusiasts involved in automotive research will appreciate the extensive scope of this reference. Cross-referenced throughout, it will serve as a valuable research tool.

Small-Block Chevy Marine Performance The

On the 29 June 1914 Archduke Franz  
Ferdinand was assassinated in Sarajevo  
triggering events leading to the outbreak of the  
First World War. Less well known is that the  
car he was in was a borrowed Graf + Stift  
Double Phaeton, that the route was published  
in advance, and the decision to lower the hood  
was only taken at the last minute. As with the  
other events in this book, the car played a  
central role, yet its history is largely unknown.  
These cars not only had their own stories in  
terms of design, ownership, and the role they  
played but they are also a way of telling the  
story of the events themselves – they are  
literally a vehicle for history. In this book  
James Morrison takes 20 cars involved in  
twenty key 20th century world events and  
examines their involvement and history to  
provide a new angle and fascinating insights.
