Tucked among the great pioneer destinations on the Oregon Trail is the fertile agricultural area of the Willamette Valley. Today the valley forms the cultural and political heart of Oregon and is home to three-quarters of the state's population. The beginning of the 20th century saw the entrance of Filipinos into the valley, arriving from vegetable farms in California and Washington, fish canneries in Alaska, and from the pineapple and sugar plantations in Hawaii. At the same time, the U.S. territorial government in the Philippines started sponsoring Filipino students, beginning in 1903, to study in the United States. Oregon's two biggest centers of education, today's University of Oregon in Eugene and Oregon State University in Corvallis, became home to Filipinos from the emerging independent Philippine nation. They were mostly male, the children of wealthy Filipinos who had connections. Most of them returned to the Philippines upon graduation; some stayed and created a new life in America.

On the eve of a new century, an up-and-coming Theodore Roosevelt set out to transform the U.S. into a major world power. The Spanish-American War would forever change America's standing in global affairs, and drive the young nation into its own imperial showdown in the Philippines. From Admiral George Dewey's legendary naval victory in Manila Bay to the Rough Riders' heroic charge up San Juan Hill, from Roosevelt's rise to the presidency to charges of U.S. military misconduct in the Philippines, *Honor in the Dust* brilliantly captures an era brimming with American optimism and confidence as the nation expanded its influence abroad.

This “ groundbreaking book . . . is essential reading not only for the Filipino diaspora but for anyone who cares about the mysteries of racial identity ” (Jose Antonio Vargas, Pulitzer Prize – winning journalist). Is race only about the color of your skin? In *The Latinos of Asia*, Anthony Christian Ocampo shows that what “ color ” you are depends largely on your social context. Filipino Americans, for example, helped establish the Asian American movement and are classified by the US Census as Asian. But the legacy of Spanish colonialism in the Philippines means that they share many cultural characteristics with Latinos, such as last names, religion, and language. Thus, Filipinos ’ “ color ” —their sense of connection with other racial groups—changes depending on their social context. The Filipino story demonstrates how immigration is changing the way people negotiate race, particularly in cities like Los Angeles where Latinos and Asians now constitute a collective majority. Amplifying their voices, Ocampo illustrates how second-generation Filipino Americans ’ racial identities change depending on the communities they grow up in, the schools they attend, and the people they befriend. Ultimately, *The Latinos of Asia* offers a window into both the racial consciousness of everyday people and the changing racial landscape of

American society.

A “ fascinating ” look at what students in Russia, France, Iran, and other nations are taught about America (*The New York Times Book Review*). This “ timely and important ” book (*History News Network*) gives us a glimpse into classrooms across the globe, where opinions about the United States are first formed. *History Lessons* includes selections from textbooks and teaching materials used in Russia, France, Iran, Saudi Arabia, Cuba, Canada, and others, covering such events as the American Revolution, the Cuban Missile Crisis, the Iran hostage crisis, and the Korean War—providing some alternative viewpoints on the history of the United States from the time of the Viking explorers to the post-Cold War era. By juxtaposing starkly contrasting versions of the historical events we take for granted, *History Lessons* affords us a sometimes hilarious, often sobering look at what the world thinks about America ’ s past.

“Adam Burns explores the American imperial venture in the Philippines through the lens of a single individual: William Howard Taft. Taft held a number of positions (head of the second

Philippine Commission, first US civil governor of the islands, US Secretary of War, and US president) which mark him out from others in the period as an individual of unparalleled influence over US-Philippine policy during its formative years. Although initially a skeptic of imperialism, Taft came to believe that the best course for US-Philippine relations was a permanent imperial bond much like the relationship between Great Britain and Canada or Australia at the time. Based largely on personal correspondence and other primary documentation, this book researches in great depth Taft and his views on empire-building from 1900 to 1921, when Taft was appointed to the Supreme Court" --

A sweeping history of America's long and fateful military relationship with the Philippines amid a century of Pacific warfare Ever since US troops occupied the Philippines in 1898, generations of Filipinos have served in and alongside the US armed forces. In *Bound by War*, historian Christopher Capozzola reveals this forgotten history, showing how war and military service forged an enduring, yet fraught, alliance between Americans and Filipinos. As the US military expanded in Asia, American forces confronted their Pacific rivals from Philippine bases. And from the colonial-era Philippine Scouts to post-9/11 contractors in Iraq and Afghanistan, Filipinos were crucial partners in the exercise of US power. Their service reshaped Philippine society and politics and brought thousands of Filipinos to America. Telling the epic story of a century of conflict and migration, *Bound by War* is a fresh, definitive portrait of this uneven partnership and the two nations it transformed.

Unlike other conventional histories, the unifying thread of *A History of the Philippines* is the struggle of the peoples themselves against various forms of oppression, from Spanish conquest and colonization to U.S. imperialism. Constantino provides a penetrating analysis of the productive relations and class structure in the Philippines, and how these have shaped and been shaped by the role of the Filipino people in the making of their own history. Additionally, he challenges the dominant views of Spanish and U.S. historians by exposing the myths and prejudices propagated in their work, and, in doing so, makes a major breakthrough toward intellectual decolonization. This book is an indispensable key to the history of

conquest and resistance in the Philippine. *History Lessons Legacies of War*
In this wide-ranging cultural and political history of Filipinos and the Philippines, Vicente L. Rafael examines the period from the onset of U.S. colonialism in 1898 to the emergence of a Filipino diaspora in the 1990s. Self-consciously adopting the essay form as a method with which to disrupt epic conceptions of Filipino history, Rafael treats in a condensed and concise manner clusters of historical detail and reflections that do not easily fit into a larger whole. *White Love and Other Events in Filipino History* is thus a view of nationalism as an unstable production, as Rafael reveals how, under what circumstances, and with what effects the concept of the nation has been produced and deployed in the Philippines. With a focus on the contradictions and ironies that suffuse Filipino history, Rafael delineates the multiple ways that colonialism has both inhabited and enabled the nationalist discourse of the present. His topics range from the colonial census of 1903-1905, in which a racialized imperial order imposed by the United States came into contact with an emergent revolutionary nationalism, to the pleasures and anxieties of nationalist identification as evinced in the rise of the Marcos regime. Other essays examine aspects of colonial domesticity through the writings of white women during the first decade of U.S. rule; the uses of photography in ethnology, war, and portraiture; the circulation of rumor during the Japanese occupation of Manila; the reproduction of a hierarchy of languages in popular culture; and the spectral presence of diasporic Filipino communities within the nation-state. A critique of both U.S. imperialism and Filipino nationalism, *White Love and Other Events in Filipino History* creates a sense of epistemological vertigo in the face of former attempts to comprehend and master Filipino identity. This volume should become a valuable work for those interested in Southeast Asian studies, Asian-American studies, postcolonial studies, and cultural

studies.

"Connecting" and "distancing" have been two prominent themes permeating the writings on the historical and contemporary developments of the relationship between Southeast Asia and China. As neighbours, the nation-states in Southeast Asia and the giant political entity in the north communicated with each other through a variety of diplomatic overtures, political agitations, and cultural nuances. In the last two decades with the rise of China as an economic powerhouse in the region, Southeast Asia's need to connect with China has become more urgent and necessary as it attempts to reap the benefit from the successful economic modernization in China. At the same time, however, there were feelings of ambivalence, hesitation and even suspicions on the part of the Southeast Asian states vis-a-vis the rise of a political power which is so less understood or misunderstood. The contributors of this volume are authors of various disciplinary backgrounds: history, political science, economics and sociology. They provide a spectrum of perspectives by which the readers can view Sino-Southeast Asia relations.

The Latinos of Asia
Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This

publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.
