It may surprise many that William Penn, who founded one of the thirteen original American colonies, spent just four years on American soil. Even more surprising, though, is Penn's remarkable impact on the fundamental principles of religious freedom on both sides of the Atlantic, especially given his tumultuous life: from his youthful radicalism as leader of the

Quaker movement to his role as governor and proprietor of a major American colony; from royal courtier to alleged traitor to the Crown. In the first major biography of this important transatlantic figure in more than forty years, Andrew R. Murphy takes readers through the defiant and complex life of a religious dissenter, political theorist, and social activist.

Black business activity has been sustained in America for almost four centuries. From the marketing and trading activities of African slaves in Colonial America to the rise of 20th-century black corporate America, African American participation in self-employed economic activities has been a persistent theme in the black experience. Yet, unlike other topics in African American history, the study of black business has been limited. General reference sources on the black experience—with their emphasis on social, cultural, and political life—provide little information on topics related to the history of black business. This invaluable encyclopedia is the only reference source providing information on the broad range of topics that illuminate black business history. Providing readily accessible information on the black business experience, the encyclopedia provides an overview of black business activities, and underscores the existence of a historic tradition of black American business participation. Entries range from biographies of

black business people to overview surveys of business activities from the 1600s to the 1990s, including slave and free black business activities and the Black Wallstreet to coverage of black women's business activities, and discussions of such African American specific industries as catering, funeral enterprises, insurance, and hair care and cosmetic products. Also, there are entries on blacks in the automotive parts industry, black investment banks, black companies listed on the stock market, blacks and corporate America, civil rights and black business, and black athletes and business activities.

Clothed in Robes of Sovereignty examines the material artifacts, festivities, and rituals by which Congress endeavored not only to assert its political legitimacy and to bolster the war effort, but ultimately to glorify the United States and to win the allegiance of the American people. But fact, as Benjamin H. Irvin demonstrates, the "people out of doors"--including the working poor, women,

loyalists, Native Americans and others not represented in Congress--vigorously contested the trappings of nationhood into which Congress had enfolded them.

Paper Knowledge is a remarkable book about the mundane: the library card, the promissory note, the movie ticket, the PDF (Portable Document Format). It is a media history of the document. Drawing examples from the 1870s, the 1930s, the 1960s, and today, Lisa Gitelman thinks across the media that the

document form has come to inhabit over the last 150 years, including letterpress printing, typing and carbon paper, mimeograph, microfilm, offset printing, photocopying, and scanning. Whether examining late nineteenth century commercial, or "job" printing, or the Xerox machine and the role of reproduction in our understanding of the document, Gitelman reveals a keen eye for vernacular uses of technology. She tells nuanced, anecdote-filled stories of the waning of old technologies and the emergence of new. Along the way, she discusses documentary matters such as the relation between twentieth-century technological innovation and the management of paper, and the interdependence of computer programming and documentation. *Paper Knowledge* is destined to set a new agenda for media studies.

Classic Books Library presents this brand new edition of “ *The Federalist Papers* ” , a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “ *The Federalist* ” , as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. compendium, and the three are known as some of the Founding Fathers of the United States.

Alexander Hamilton (c. 1755 – 1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States. The Georgia of the North is a historical narrative about Black women and the long civil rights movement in New Jersey from the Great Migration to 1954. Specifically, the critical role played by Black women in forging interracial, cross-class, and cross-gender alliances at the local and national level and their role in securing the passage of progressive civil rights legislation in the Garden State is at the core of this book. This narrative is largely defined by a central question: How and why did New Jersey's Black leaders, community members, and women in particular, affect major civil rights legislation, legal equality, and integration a decade before the Brown v. Board of Education, Topeka, Kansas decision? In this analysis, the history of the early Black freedom struggle in New Jersey is predicated on the argument that the Civil Rights Movement began in New Jersey, and that Black women were central actors in this struggle.

Since the 1970s I have pursued three separate but overlapping and sometimes simultaneous careers: (1) philosopher / writer / teacher / historian of the long nineteenth century, 1789-1914; (2) editor / translator / photographer / publisher / biographer / encyclopedist; (3) cataloging librarian / rare books and special collections librarian / historian of medicine. Somehow these three vocations have garnered me some acclaim, even an entry in Who's Who in America. Each of them has resulted in some published or presented works. Because these works have been scattered in a wide variety of venues, some of which have gone out of print or have otherwise become generally unavailable - and of course with the oral presentations being gone as soon as they are

given - I have thought it wise to select, epitomize, and bring them together in one place - here. Thus, what follows in these volumes is what I consider to be the most important of my shorter works.

A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and

repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had "no visibility into who the bad guys are." His successor, Robert Gates, said: "We didn't know jack shit about al-Qaeda." The Afghanistan Papers is a "searing indictment of the deceit, blunders, and hubris of senior military and civilian officials" (Tom Bowman,

NRP Pentagon Correspondent) that will supercharge a long-overdue reckoning over what went wrong and forever change the way the conflict is remembered.
