This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Excerpt from A History of the Philomathean Society of the University of Pennsylvania: With Some Account of What Its Members Have Done In presenting this work the editors are aware of its many defects, but they beg the indulgence of the reader, calling attention to the fact that they have been hampered by their ignorance as amateurs, and by the inaccessibility of the desired information. Every fact of history in this volume has been as far as possible tested by the records of

the Society and the memories of the alumni. Corroboration of details has been no small part of the work. Every living member of the Society has been communicated with at least twice during the past eighteen months; some more than twice; for those who were prominent during Junior membership already know well how often the editors have bothered them. Therefore, the editors hope the Senior members will overlook the faults of the volume, and complete and accurate as circumstances allow. To those who are not members of Philo, the editors offer their work as a memorial of the one hundred years' unbroken e Society, and as a testimony that Philo has always by her sons.
