It can be tough on a family when someone new has moved in, especially if it's a 900-pound scaredy-bear so terrified of wilderness life that he's fled to the burbs. Fortunately Bear was found by Molly, a fearlessly optimistic 11-year-old can-doer who has taken him firmly in hand, devoted to seeing her hirsute BFF cope with modern life. Molly's Mom is happy with the new sibling -- Bear's an excellent conversationalist and loves her homemade cookies. But Dad is having a harder time,

his role as center of the universe now shared with an ursine behemoth who, unfortunately, adores him.

- Details how sacred sites resonate at the same frequencies as both the Earth and the alpha waves of the human brain
- Shows how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites
- Explains how ancient hero myths from around the world relate to divine acoustic science and formed the source of religion

The Earth resonates at an extremely low frequency. Known as "the Schumann Resonance," this natural rhythm of the Earth precisely corresponds with the human brain's alpha wave frequencies--the frequency at which we enter into and come out of sleep as well as the frequency of deep meditation, inspiration, and problem solving. Sound experiments reveal that sacred sites and structures like stupas, pyramids, and cathedrals also resonate at these special frequencies when activated by chanting and singing. Did our ancestors build their sacred sites according to the

rhythms of the Earth? Exploring the acoustic connections between the Earth, the human brain, and sacred spaces, David Elkington shows how humanity maintained a direct line of communication with Mother Earth and the Divine through the construction of sacred sites, such as Stonehenge, Newgrange, Machu Picchu, Chartres Cathedral, and the pyramids of both Egypt and Mexico. He reveals how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites, showing how, for example, recognizable hieroglyphs appear in sand patterns when the sacred frequencies of the Great Pyramid are activated. Looking at ancient hero legends--those about the bringers of important knowledge or language--Elkington explains how these myths form the source of ancient religion and have a unique mythological resonance, as do the sites associated with them. The author then reveals how religion, including Christianity, is an ancient language of acoustic science given expression by the world's sacred sites and shows that power places played a profound role in the development of human civilization.

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector.

---

Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the

promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set

A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and

---

the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, *Making Sense of Data II* addresses the following key techniques for advanced data analysis: *Data Visualization* reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. *Clustering* outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. *Agglomerative hierarchical clustering*, *partitioned-based clustering*, and *fuzzy clustering* are also discussed. *Predictive Analytics* presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. *Applications* demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within

the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series ([www.makingsenseofdata.com](http://www.makingsenseofdata.com)) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the *Traceis*<sup>TM</sup> software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, *Making Sense of Data II* is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.
