Hitachi Universal Replicator for Mainframe User Guide Hitachi Virtual Storage Platform G1000 and G1500 Hitachi Virtual Storage Platform F1500 MK-92RD8022-12

Hitachi storage systems - IBM

Hitachi Universal Replicator (HUR) is an array-side software and journal disk caching solution that offers fast and efficient replication of small or large data volumes. It can help manage tight RPO times and supports replication across a three-data-center cascade or multiple data-centers.

Global Active Device - Hitachi Data Systems

One of the nice aspects of TrueCopy and Universal Replicator is that they play well with other HDS storage abilities. A single volume can have both a TrueCopy pairing and a Universal Replicator pairing, to two different storage systems, and yet still be able to have clones or snapshots created for this volume.

Hitachi Universal Storage Platform V

Hitachi Universal Replicator User's Guide Intended Audience This document is intended for system administrators, Hitachi Data Systems representatives, and Authorized Service Providers who are involved in installing, configuring, and operating the Hitachi Universal Storage Platform V storage system. This document assumes the following:

Hitachi Universal Replicator

View this short video to learn about Hitachi Universal Replicator (HUR). This software connects two storage systems at long distances using asynchronous remote copy.

Hitachi Unified Storage VM Block Module

Before you start replicating data with Hitachi TrueCopy or Universal Replicator software, you must be familiar with the Hitachi TrueCopy and Universal Replicator documentation, have the Hitachi TrueCopy or Universal Replicator product, and have the latest Hitachi TrueCopy or Universal Replicator patches installed on your system.
