Replicate Over Any Distance With Hitachi Universal ...

View this short video to

learn about Hitachi Universal Replicator (HUR). This software connects two storage systems at long distances using asynchronous remote copy.

Hitachi Universal Replicator - HUR step-by-step config - ToHDS

This guide provides the information and instructions for storage administrators to be able to configure remote replication to enable recovery from region-wide disasters with Hitachi Virtual Storage Platform G series and F series storage

systems.

Hitachi Universal Replicator for Mainframe User Guide

Hitachi Universal Replicator is Hitachi's solution to async replication. Their implementation thought is a bit different than other solutions like EMC's recoverpoints. Yes, they do use journals as well, but they will only use them if needed.

Replicator - Hitachi Vantara
Knowledge](#)

One of the nice aspects of
TrueCopy and Universal
Replicator is that they play
well with other HDS storage
abilities. A single volume can
have both a TrueCopy pairing
and a Universal Replicator

pairing, to two different
storage systems, and yet still
be able to have clones or
snapshots created for this
volume.
