It is now time to break down the ideology of exceptionalism

in the United States and other Anglo-American nations if we are to develop reforms that will truly inspire our teachers to improve learning for all our students especially those who struggle the most. In that essential quest, Pasi Sahlberg is undoubtedly one of the very best teachers of all. From the Foreword by Andy Hargreaves, Lynch School of Education, Boston College Finnish Lessons is a first-hand, comprehensive account of how Finland built a world-class education system during the past three decades. The author traces the evolution of education policies in Finland

and highlights how they differ from the United States and other industrialized countries. He shows how rather than relying on competition, choice, and external testing of students, education reforms in Finland focus on professionalizing teachers work, developing instructional leadership in schools, and enhancing trust in teachers and schools. This book details the complexity of educational change and encourages educators and policymakers to develop effective solutions for their own districts and schools. **A proposal, etc**

This book examines the powerful role of writing in society. The invention of writing, independently at various places and times in history, always stood at the cradle of powerful civilizations. It is impossible to imagine modern life without writing. As individuals and

social groups we hold high expectations of its potential for societal and personal development. Globally, huge resources have been and are being invested in promoting literacy worldwide. So what could possibly be tyrannical about writing? The title is inspired by Ferdinand de

Saussure's argument against writing as an object of linguistic research and what he called la tyrannie de la lettre. His critique denounced writing as an imperfect, distorted image of speech that obscures our view of language and its structure. The chapters of the book, written by experts in language

---

and literacy studies, go beyond this and explore tyrannical aspects of writing in society through history and around the world: from Medieval Novgorod, the European Renaissance and 19th-century France and Germany over colonial Sudan to postcolonial Sri Lanka and Senegal and present-day Hong Kong and

Central China to the Netherlands and Spain. The metaphor of 'tyranny of writing' serves as a heuristic for exploring ideologies of language and literacy in culture and society and tensions and contradictions between the written and the spoken word.

This volume explores the instructional use of creative writing in secondary and post-secondary contexts to enhance students' language proficiency and expression in English as a second or foreign language (ESL/EFL). Offering a diverse range of perspectives from scholars and practitioners involved in English language teaching (ELT) globally, *International Perspectives on Creative Writing in Second Language Education* tackles foundational questions around why fiction and creative writing have been

---

traditionally omitted from ESL and EFL curricula. By drawing on empirical research and first-hand experience, contributors showcase a range of creative genres including autobiography, scriptwriting, poetry, and e-Portfolios, and provide new insight into the benefits of second language creative writing for learners' language proficiency, emotional expression, and identity development. The volume makes a unique contribution to the field of second language writing by highlighting the breadth of

second language users throughout the world, and foregrounding links between identity, learning, and ESL/EFL writing. This insightful volume will be of particular interest to postgraduate students, researchers, and academics in the fields of ESL/EFL learning, composition studies, and second language acquisition (SLA). Those with a focus on the use of creative writing in classrooms more broadly, will also find the book of interest.

This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible “meta-language” (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating

---

collaboration across content and angle on the field by asking language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive

difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry. *English Language Assessment*

In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs.

Due to the lack of reliable, valid assessment, measurement, and large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field.

The Politics of the Common Law offers a critical introduction to the legal system of England and Wales. Unlike other conventional accounts, this revised and updated second edition presents a coherent argument, organised around the central claim that contemporary postcolonial common law must be understood as an articulation of human rights and open justice. The book examines the impact of the European Convention and European Union law on the structures and ideologies of the common law and engages with the politics of the rule of law. These themes

The final sections of the book address the reality of civil and criminal procedure in the light of recent civil unrest in the UK and the growing privatisation of public services. The book questions whether it is possible to find a balance between the requirements of economics and the demands of justice.

EDITION OF A PARENTING CLASSIC How do you raise boys to men in a world where trouble beckons at every turn? How do you make sure they learn the 'right' lessons, stay out of danger, find a path to follow? How do you ensure they'll be OK? Celia Lashlie has some of the answers. After years working in the prison service, she knows what can happen when boys make the wrong choices. She also knows what it's like to be a parent - she raised a son on her own and feared for his survival. As a crucial part of the Good Man Project, she talked to 180

classes of boys. Her insights into what boys need - and what parents can do to help them - are ground-breaking. In this new edition of her honest, no-nonsense and best-selling book, Celia reveals what goes on inside the world of boys. With clarity and insight, she offers parents - especially mothers - practical and reassuring advice on raising their boys to become good, loving, articulate men. "Celia did an enormous amount of work, particularly standing up for at risk young people, and she made an enormous contribution." - New Zealand Prime Minister John Key

Assessing Speaking Springer  
A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school-attainment and enrollment rates

---

for several decades. However, it still faces major challenges in the education sector, and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper-middle-income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's education sector—from early childhood education through higher education. With this book, they attempt to answer three questions: • How is Sri Lanka's education system performing, especially

with respect to participation rates, learning outcomes, and labor market outcomes? • How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? • Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on

integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.

In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may

---

contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education

has been a major phenomenon in East Asia and it has far-reaching economic and social implications. *Illumination from international comparative perspectives from the BRICS countries* London : A. Deutsch  
High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of

past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the

---

same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and

state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations.
