This book tells in non-technical language how the British Navy contributed to the development of naval radar in World War 2. Addressed to the general reader, it tells not only the technical story in simple terms, but also of the operational use of shipborne radar at sea - for warning, for fire control, for fighter direction, for navigation, in all theatres of war - and particularly about the people who designed and fitted the equipment, and those who used it at sea.

Entering service between 1937 and 1939, the ten British 'Town' class cruisers were the most modern vessels of their type in the Royal Navy when the Second World War began. Built in response to large 6-inch gunned cruisers in the US and Japanese Navies and primarily designed for the defence of trade, they saw arduous service in a wide range of roles, playing a decisive part in victories such as the Battle of the Barents Sea and the destruction of the German Scharnhorst at the North Cape. The cost was heavy: four of the ships were lost and the other six all survived heavy damage, in some cases on more than one occasion. In this major study, Conrad Waters makes extensive use of archive material to provide a technical evaluation of the 'Town' class design and its subsequent performance. He outlines the class's origins in the context of inter-war cruiser policy, explains the design and construction process, and describes the characteristics of the resulting ships and how these were adapted in the light of wartime developments. An overview of service focuses on major engagements, assessing the extent to which the class met its designers' expectations and detailing the consequences of action damage. Concluding chapters continue the story into the Cold War era, examining the modernisation programme that kept the remaining ships fit for service during the 1950s. Heavily illustrated with contemporary photographs and drawings by A D Baker III, John Jordan and George Richardson, *British Town Class Cruisers* provides a definitive reference to one of the Royal Navy's most important Second World War warship designs.

This is a revelatory account of three un-tabulated special forces operations, PLUM DUFF, MIKADO and KETTLEDROM, that were tasked to destroy Argentina's Exocet missiles during the 1982 Falkland's campaign. In that context alone this book is of

international military importance. Using previously unknown material and through interviewing key players who have remained silent for 30 years, Ewen Southby-Tailyour has finally established the truth: that it has taken so long reflects the sensitivities, both military and personal, involved. Interviews with the SAS officer commanding Operation PLUM DUFF, members of the reconnaissance patrol for Operation MIKADO, plus the navigator of the helicopter that flew eight troopers into Tierra del Fuego, has allowed the author to describe the tortuous events that led, instead, to a significant survival story. The RAF pilots ordered to conduct an 'assault-landing' of two Hercules onto Rio Grande air base during Operation MIKADO have spoken of the extraordinary procedures they developed: so have the commander of the SBS and the captain of the British submarine involved in Operation KETTLEDROM. The Super Attendant pilots who sank HMS Sheffield and MV Atlantic Conveyor and then 'attacked' HMS Invincible, plus a key member of the Argentine special forces and the brigadier defending Rio Grande, add credence, depth and gravitas to the saga: as does an equally revealing interview with the SIS (MI6) officer who led the world-wide search for Exocets on the black market. Disturbing over-confidence by commanders at home was finely counter-balanced by stirring accounts of inspiring physical and moral courage across the South Atlantic. Exocet Falklands is a ground-breaking work of investigative military history from which many salutary lessons can be learned. As featured in the Daily Record, Western Morning News, Plymouth Herald and on BBC Radio Wiltshire.

In 1952 Queen Elizabeth ascended to the throne. In the sixty years of her reign so far, there have been thousands of conscripts and regular service personnel who have served under the Queen's Colours. This book celebrates their incredible achievement, covering the period from 1952 to the Queen's diamond jubilee year 2012. Service men and women recall their experiences from post-WW2 to the Falklands War in 1982, through to modern military service at the end of a millennium and into the first years of the twenty-first century. The book looks at life in barracks at home, and overseas in a variety of hot and not-so-hot spots, and major conflicts worldwide. Male and female service personnel talk candidly about their experiences, opening their world to an interested audience and allowing glimpses into military life. This book is not just about war, but the everyday lives of service men and women on land, sea and in the air, in celebration of a diamond jubilee.

Ajax, the archetypal Greek warrior, has over the years been trivialized as a peripheral character in the classics through Hollywood representations, and by the use of his name on household cleaning products. Examining a broad range of sources--from film, art and literature to advertising and sports--this study of the "Bulwark of the Achaeans" and his mythological image redefines his

presence in Western culture, revealing him as the predominant voice in The Iliad and in myriad works across the classical canon.

The ninth HMS Vanguard bearing one of the most illustrious names in the Royal Navy with honors from the Armada to Jutland was the last and largest of Britain's battleships and was commissioned in 1946. Her design evolved from of the King George V class and incorporated much of the fully developed design for the two battleships Lion and Temeraire that were laid down in 1939 but never completed. In this new book by R A Burt her design construction and career are all covered.

Armor machinery power plants and weaponry are examined in detail and the author has produced some 35 superb plans profiles and other line drawings for which he is renowned.

The missile streaked across the wave tops at the speed of sound. A single metallic sliver, packed with high explosive and spouting smoke. It shimmered against the dull blue of the South Atlantic swell, its warhead primed, its homing radar locked onto the British destroyer.

The WWII story of Norwegian resistance in the face of Nazi invasion: a daring escape for the Norwegian royal family and fifty tons of gold bullion. Gold Run recounts the thrilling story of the loyal Norwegians who rescued the Norwegian royal family, government, and nearly fifty tons of gold bullion from invading Nazis during World War II. One of the greatest gold snatches in history, it is a tale of loyal citizens who achieved an incredible feat against overwhelming odds through bravery, endurance, and leadership—plus a little good fortune and help from the British Royal Navy. The German invasion on the night of April 9, 1940, took Norway almost completely unawares. But one small coastal battery took swift action to protect the country's leadership. In desperate haste, the royal family fled Oslo by rail, dodging bombs and strafing. With extraordinary ingenuity, the gold was moved by road, rail, and fishing boat, hotly pursued by the Germans. After several instances of near disaster, the Norwegians managed to get the gold to the coast, where the Royal Navy came to the rescue. It was taken off in three Royal Navy Cruisers, HMS Enterprise, Galatea, and Glasgow. The ships were attacked in port, then constantly harassed and bombed by the Luftwaffe as they made their way back to the United Kingdom. The Germans had gained a country, but lost a king, a government, and a huge amount of bullion that would have financed their war machine.

On the evening of 30 March, 1982, Commander David Hall, chief engineer of the British nuclear submarine HMS Conqueror received a telephone call giving him the order to 'store for war'. At first he didn't believe it. In the early hours of 2 April, Argentine forces invaded the Falkland Isles. The sinking of the Belgrano was one of the most dramatic moments of the Falklands conflict. For many it signalled Britain's entry into the war and it has been seen as a politically motivated decision deliberately designed to take the country irrevocably into the fight. Now Mike Rossiter - with unprecedented access to sailors from the Belgrano and HMS Conqueror - gives us a dramatic and definitive retelling of the events that led up to the sinking. With all the pace and tension of a thriller, Sink the

Belgrano takes us inside the battle for the South Atlantic and shows us the human drama behind the famous, and controversial, Sun headline 'Gotcha!' We track the collision course between the British submarine Conqueror and the Argentine warship - as the two sides and everyone aboard head towards the climactic moment just outside the exclusion zone set up by the British around the Falkland Isles. We witness the behind-the-scenes arguments, discussions and powerbroking that led to the decision to fire the three torpedoes. And, for the first time, we hear from the sailors on both sides - the personal testimony of the hunt for and attack on the Belgrano, and from the Argentine side the experience of being under attack and the sinking that left 340 members of her crew dead.

Based on a true story, Only Bloody Lovely tells of one family's experiences of some of Sheffield's history of disasters and the ensuing impact and distress on the family. During his national service Harold Kingswood was stationed at Pembroke Dock, a flying boat station in Wales. At the end of the war he came home to Sheffield to start his new life as husband and family man. However, the Hillsborough disaster, the Falklands war, the Sheffield floods and the Sheffield blitz all tore away the family's 'happy ever after' dream. But that's just for fairy tales, anyway ... isn't it?

A definitive portrait of Queen Elizabeth II on the seventieth anniversary of her reign by a renowned royal biographer. Shy but with a steely self-confidence; inscrutable despite ten decades in the public eye; unflappable; devout; indulgent; outwardly reserved, inwardly passionate; unsentimental; inquisitive; young at heart. All of these describe Her Majesty Queen Elizabeth II, who has reigned through more seismic social change than any monarch in British history. From the Abdication to the Sussexes, from World War II to the loss of her life-long partner, she has witnessed family crises on a scale not seen since the days of George III. She is a 21st Century global phenomenon commanding unrivalled respect and affection. Sealed off during the greatest peacetime emergency of modern times, she has stuck to her own maxim: 'I have to be seen to be believed.' And now she is preparing for an event without parallel in Europe since the reign of Louis XIV: her Platinum Jubilee, celebrating seventy years on the Throne. Robert Hardman, the acclaimed and respected author of Her Majesty and Queen of the World has already examined the Queen as a modern monarch and her role as a stateswoman abroad. Now, in this entirely new study, including unpublished Royal Family papers and photographs along with personal stories from other world leaders, he wraps up the full story of one of the undisputed greats in a thousand years of monarchy. Hardman distils Elizabeth's complex life into a must-read study of dynastic survival and renewal. It is a portrait of a world leader who remains as intriguing today as the day she came to the Throne

at age twenty-five. With peerless access to members of the Royal Family, staff, friends and royal records, Queen of Our Times brings fresh insights and scholarship to the modern royal story. There will be no more thorough, more readable, more original book on the record-breaking Elizabeth II as she reaches a landmark which, surely, can never be equaled.

Monty Python's Life of Brian film is known for its brilliant satirical humour. Less well known is that the film contains references to what was, at the time of its release, cutting edge biblical scholarship and Life of Jesus research. This research, founded on the acceptance of the Historical Jesus as a Jew who needs to be understood within the context of his time, is implicitly referenced through the setting of the Brian character within a tumultuous social and political background. This collection is a compilation of essays from foremost scholars of the historical Jesus and the first century Judaea, and includes contributions from George Brooke, Richard Burridge, Paula Fredriksen, Steve Mason, Adele Reinhartz, Bart Ehrman, Amy-Jill Levine, James Crossley, Philip Davies, Joan Taylor, Bill Telford, Helen Bond, Guy Stiebel, David Tollerton, David Shepherd and Katie Turner. The collection opens up the Life of Brian to renewed investigation and, in so doing, uses the film to reflect on the historical Jesus and his times, revitalising the discussion of history and Life of Jesus research. The volume also features a Preface from Terry Jones, who not only directed the film, but also played Brian's mum.

SONS OF TUBAL-CAIN Casemate

This book provides both a personal story and a deep insight into life in the Royal Navy during the mid 20th Century. It contains fascinating details of daily life aboard ship as well as exciting accounts of wartime action in North Atlantic convoy duty - including the

infamous sinking of two U-boat aces "Otto Kretschmer in U-99" and "Joachim Schepke in U-100" in a single night. Walter Edney joined the Royal Navy in 1934 at the lowest rank: a boy seaman. Over the next 25 years, he rose through the ranks, eventually becoming a Commissioned Officer and the commander of HMS Fenton. To do this he had to cross a huge class divide between "lower ranks" and "higher ranks" and his promotion was exceptional. This book is taken directly from his personal memoirs written based on the detailed dairies that he kept through his life. As a result it provides a first-hand account of Naval life as well as a warm personal story. During his career, Walter Edney served on HMS Iron Duke, HMS Nelson, HMS Maidstone, HMS Vanoc, HMS Sheffield, HMS Constance among others. Before WW2 he showed the strength of the British Empire aboard HMS Nelson. During WW2 he fought on a tiny destroyer in the North Atlantic, protecting convoys of merchant ships against U-boat attack. He also landed at Anzio in Italy to provide a communications centre. After the war, in HMS Sheffield he toured the major ports of North and South America to show the flag and celebrate with the expatriate British communities. In the Korean war he patrolled Korean waters under threat of hostile fire and, finally, during the Cyprus crisis he patrolled in the Mediterranean Sea. Throughout all this he raised a family of four children and was devoted to his wife, Thelma, who he married during WW2. This book is an authentic account of Navy life written by hands that had done all the jobs from scrubbing the decks to saluting the Duke of Edinburgh.
