The Complete Reference Manual CMAT 2022

Harper Collins

Played on frozen ponds in cold northern lands, hockey seemed an especially unlikely game to gain a global following. But from its beginnings in the nineteenth century, the sport has drawn from different cultures and crossed boundaries—between Canada and the United States, across the Atlantic, and among different regions of Europe. It has been a political flashpoint within countries and internationally. And it has given rise to far-reaching cultural changes and firmly held traditions. The Fastest Game in the World is a global history of a global sport, drawing upon research conducted around the world in a variety of languages. From Canadian prairies to Swiss mountain resorts, Soviet housing blocks to American suburbs, Bruce Berglund takes readers on an international tour, seamlessly weaving in hockey's local, national, and international trends. Written in a lively style with wide-ranging breadth and attention to telling detail, The Fastest Game in the World will thrill both the lifelong fan and anyone who is curious about how games intertwine with politics, economics, and culture.

Stories from behind the scenes of one of hockey's longest running and most popular

broadcasts, Hockey Night in Canada's Satellite Hot Stove, from an insider who's seen it all. For more than twenty years, hockey fans tuned in during intermission on Saturday nights to watch one of the most popular segments in the game's long broadcasting history. They'd hear news from around the league, the latest rumours and gossip, and—of course—some of the most controversial opinions of the day. No, we're not talking about Coach's Corner. The Satellite Hot Stove was a revolutionary show for talking about the game we love. Here, during the second intermission of the first game of every Hockey Night in Canada broadcast, pundits, and insiders would convene in studios across North America—in arenas and other locales—to discuss the biggest topics. Hot Stove was the best place to get news, opinions, and a good laugh. And Al Strachan was in the middle of it all. A bestselling author and award-winning sports journalist, he has been writing and talking about hockey for more than forty years. As a regular TV pundit on Hot Stove, he witnessed the most exciting and talked-about episodes in the modern game. And more than once, his unfiltered, say-it-as-it-is style added controversy of its own, too. In this new book, he relives the best stories of his long career, from working with some of the biggest personalities, on and off the ice, to the hijinks that went on behind the cameras. From embarrassing himself in front of Scotty Bowman, to cooking up a plan with Wayne Gretzky to save hockey, and frank conversations with Ken Dryden and hockey's elite, Hockey's Hot Stove delivers all new hockey stories you won't hear anywhere else.

Reference librarians are no longer expected to know much about the information they find; they are merely expected to find it. Technological competency rather than knowledge has become the order of the day. In many respects, reference service has become a matter of typing search terms into a library's online catalog or a web search engine and providing the patron with the results of the search. Calling for a re-intellectualization of reference librarianship, this book suggests another approach to providing quality reference service--reading. The authors surveyed both academic reference librarians and public library reference personnel in the United States and Canada about their reading habits. From the 950 responses, the authors present findings about the extent to which librarians read newspapers, periodicals,

fiction and nonfiction, and recount and analyze stories about how reading has made them better librarians. The authors also report that North American professors in the humanities and social sciences believe that the best reference librarians are those who have wide-ranging, subject-based knowledge as opposed to the type of process-based, functional knowledge that is increasingly dominating the curricula of many Library and Information Science programs.
