History of the Holden V8 part  
two: 1980-2000  
a standard rebuilt should hit  
around 2k, for a stock standard  
motor, they have to use  
hardened valve seats for ULP so

---

it will be fine for LPG. the 100% gas thing, is for the tune and fuel system, when you install it, you get the engine tuned and set up for gas (remove fuel tank, run a gas carby/injection).

Holden 304 Engine

In 1985, the special editions modified by Holden and their official after-market tuner, Peter Brock's HDT Special Vehicles, began introducing the 5.0 L; 304.3 cu in (4,987 cc) version of the engine, created to slip underneath the 5,000 cc (305 cu in) engine capacity cut-off in Group A touring car regulations, allowing Commodore competitors to run

at a lower competition weight.

Its more like 100lbs lighter  
then a cast iron V8. The LS1  
weighs 3kg more then a Buick  
V6 3.8L (commodore engine)  
remove the bulky A/C  
compressor and P/S pump  
and you've savd near another  
12-15kg. I had to run 4/6  
cylinder suspension in the  
front of mine due to the  
weight being around the same  
as a 202.

Several versions of the 304ci engine  
were produced. Coded LV2 or  
A9L, they were used on the VK  
Group A SS. This series was  
painted black. During the life of the  
VL series, HSV released a Group A  
EFI version of the LV2 engine.

From the VN series, Holden  
changed the engine designation to  
5000 V8. Blocks were now drilled  
for the Chev bolt pattern.

Holden 304 - Engine Master  
Australia

As it stands: Exhaust: Genie

extractors going into two 2.5"  
pipes with twin cats, into one  
straight through muffler coming  
out to one 3" exhaust is \$1700 all  
up (stainless steel for the last  
part) . However, I will hunt  
around and buy the extractors,  
the cats, the muffler, and install  
the extractors myself.
