Kat cajoles Josh into going with her to a remote settlers hut in a regional farming area to investigate a stash of what could be dinosaur bones collected over a lifetime by a recently deceased cattle drover. The bones were only discovered after his death, and Kat has been asked by a palaeontologist friend to check out the collection. Camping in a remote area, they strike up an unusual friendship with a local stockman who, with his local knowledge, leads them to safety when they get caught up in an emergency and have to flee for their lives.
