The single greatest issue
is the timing chain fault
that the V6 engine is very

common for. Unfortunately
the Holden V6 is known for
stretched timing chains
which is a very costly fix.
We have addressed this in
a previous blog post which

Cost of rebuild depends on
how much wear/tear there is,
how much machining is
required, how many new parts
are required. I haven't rebuilt
an engine for over 15 years
now, so the difference
between cost then vs the cost
today would be massive, so
I'm not even going to try
guessing in this case.
