The years since 9/11 have seen major changes in the way snipers are employed on the modern battlefield, alongside an incredibly rapid evolution in their weapons, equipment and training. This book covers the 14 years of near-constant warfare since the dawn of the 21st century, documenting where, when and how snipers have been deployed; their rifles, optics and their ancillary equipment such as laser range finders; their training and tactics and accounts of real-life operations involving sniper teams. The wars in Iraq and Afghanistan have reaffirmed the importance of snipers in both conventional and unconventional warfare, and this new study covers these developments in depth, as well as looking at the role of the sniper in police and counterterrorism environments.

U.S. Marines in Afghanistan, 2010-2014 Encounter Books

The challenges to American security in the Western Pacific, the seas that surround Europe, and the Persian Gulf are growing. At the same time, U.S. military commanders seek more naval forces to protect America's interest in the safe transit of American goods, deterrence in a proliferating world, and the defense of our key allies. At the same time U.S. defense budgets are shrinking. American seapower has not been as small as it is today since before World War I. Unless reversed, U.S. seapower will continue its decline into the indefinite future as politicians ignore the widening gulf between the cost of modernizing and expanding American seapower, and the resources devoted to this most strategic arm of the nation's defense. Seablindness explains the dilemma. It looks at the consequences of neglect including the effect of increased deployments on families, global scenarios set in the immediate future, the views of America's most knowledgeable military officers, the anxious reactions of U.S. allies, and hard facts to show how a lack of political will is dismantling the nation's global reach and with it, our position as the world's great power.

Among the world ' s military air arms, United States Marine Corps Aviation occupies a unique tactical niche. As the air component of a combined-arms expeditionary force, it exists primarily to support Marine combat forces on the ground in their amphibious assault mission. From the “ Banana Wars ” of the 1920s to the present day “ War on Terror, ” Marine aviation has undergone a lengthy fine-tuning process not only in terms of warfare doctrines and tactics, but also in the types of aircraft needed to accomplish the mission. This comprehensive survey provides the history, technical specifications, drawings, and photographs of every type of fixed and rotary-wing aircraft used by Marine Air from its origins prior to World War I up to current operations.

This Vietnam War biography recounts the story of an American soldier who heroically gave his life to save his comrades. Private 1st Class Douglas E. Dickey was just twenty years old when he dove onto a grenade, saving the lives of four men, including his platoon leader. The young Marine's actions on Easter Sunday 1967 won him a posthumous Medal of Honor. Dickey grew up in Ohio and enlisted in the Marine Corps with four of his high school friends. After he was deployed to Vietnam, he took part in Operation Deckhouse VI, a landing in Quang Ngai, then Operation Beacon Hill, which led him and his comrades into a devastating ambush. During the ensuing battle—one that nearly wiped out the entire platoon—a grenade landed in their midst. Without hesitation, Dickey took action. This biography grounds Dickey's final, valiant act in the context of his life and the lives of his comrades and family. It is based on over a decade of research, including interviews with family members and Dickey's letters home. A tribute to a true hero, A Final Valiant Act also includes the most detailed account of Operation Beacon Hill ever written.

The founder of Blackwater offers the gripping true story of the world's most controversial military contractor. In 1997, former Navy SEAL Erik Prince started a business that would recruit civilians for the riskiest security jobs in the world. As Blackwater's reputation grew, demand for its services escalated, and its men eventually completed nearly 100,000 missions for both the Bush and Obama administrations. It was a huge success except for one problem: Blackwater was demonized around the world. Its employees were smeared as mercenaries, profiteers, or worse. And because of the secrecy requirements of its contracts with the Pentagon, the State Department, and the CIA, Prince was unable to correct false information. But now he's finally able to tell the full story about some of the biggest controversies of the War on Terror, in a memoir that reads like a thriller.

"Required Reading" Marine Corps Professional Reading Program Bluejacket Paperback Book Series In this riveting insider's chronicle, legendary Marine General "Brute" Krulak submits an unprecedented examination of U.S.

Marines--their fights on the battlefield and off, their extraordinary esprit de corps. Deftly blending history with autobiography, action with analysis, and separating fact from fable, General Krulak touches the very essence of the Corps: what it means to be a Marine and the reason behind its consistently outstanding performance and reputation. Krulak also addresses the most basic but challenging question of all about the Corps: how does it manage to survive--even to flourish--despite overwhelming political odds and, as the general writes, "an extraordinary propensity for shooting itself in the foot?" To

answer this question Krulak examines the foundation on which the Corps is built, a system of intense loyalty to God, to country, and to other Marines. He also takes a close look at Marines in war, offering challenging accounts of their experiences in World War II, Korea, and Vietnam. In addition, he describes the Corps's relationship to other services, especially during the unification battles following World War II, and offers new insights into the decision-making process in times of crisis. First published in hardcover in 1984, this book has remained popular ever since with Marines of every rank.

Japan's unusual position in the realm of international politics encapsulates a three-fold juxtaposition: both in and out of Asia, both occupied by and a close ally of the United States, and both a key trade partner and a strategic rival of China. Whilst international relations theory offers a number of ways to analyse these relations, this book instead utilizes the concept of risk to provide an innovative perspective on Japan's relations with China, North Korea and the US. The book elucidates how risk, potential harm and harm are faced disproportionately by certain groups in society.

This is demonstrated by providing an empirically rich analysis of the domestic implications of security relations with China, North Korea and the United States through the presence of US troops in Okinawa. Beginning with a theoretical discussion of risk, it goes on to demonstrate how the concept of risk adds value to the study of international relations in three senses. First, the concept helps to break down the boundaries between the international and domestic. Second, the focus on risk and the everyday directs us to ask basic questions about the costs and benefits of a security policy meant to secure the national population. Third, what implications do these two points have for governance? The question is one of governance as Japan's externally oriented security policy produces domestic insecurity shared disproportionately, not equally, as this volume makes clear. Developing the theory of risk as a tool for understanding international relations, this book will be of great interest to students and scholars of Asian politics, Japanese politics, international relations and security studies, as well as to policy makers and practitioners working in the field.

Marine Corps Reference Publication (MCRP) 3-35.1A, Small Unit Leader's Guide to Mountain Warfare Operations, is a reference for all Marine leaders (team through company) to use when conducting operations in mountainous terrain, snow, cold weather, and/or high altitude. This publication is to be used in conjunction with the Marine Corps Warfighting Publication 3-35.1, Mountain Warfare Operations, and its other associated MCRPs 3-35.1B, Mountain Leader's Guide to Winter Operations; 3-35.1C, Mountain Leader's Guide to Mountain Warfare Operations; and 3-35.1D, Cold Region Operations. The series covers a broad spectrum of individual and small unit tactics, techniques, and procedures across all six warfighting functions. Topics include the environment, specialized clothing and equipment,

weapons considerations, patrolling considerations, route selection and navigation, basic avalanche hazard assessment and mitigation, crossing streams/ice, snowshoeing, winter camouflage, logistics, fire support, helicopter operations, and casualty evacuation. It stresses only the skills necessary for Marines to function in combat. Because of the rapid turnover in personnel, operational tempo, and the multitude of training commitments, the Marine Corps Mountain Warfare Training Center cannot train all Marines or units. In combat, Marines may need to learn through doctrinal references that are augmented with instruction from their unit's qualified summer and winter mountain leaders. This MCRP gives them that capability. This publication supersedes MCRP 3-35.1A, Small Unit Leader's Guide to Cold Weather Operations, dated 16 November 1990. In U.S. Military Operations: Law, Policy, and Practice, a distinguished group of military experts comprehensively analyze how the law is applied during military operations on and off the battlefield. Subject matter experts offer a unique insiders perspective on how the law is actually implemented in a wide swath of military activities, such as how the law of war applies in the context of multi-state coalition forces, and whether non-governmental organizations involved in quasi-military operations are subject to the same law. The book goes on to consider whether U.S. Constitutional 4th Amendment protections apply to the military's cyber-defense measures, how the law guides targeting decisions, and whether United Nations mandates constitute binding rules of international humanitarian law. Other areas of focus include how the United States interacts with the International Committee of the Red Cross regarding its international legal obligations, and how courts should approach civil claims based on war-related torts. This book also answers questions regarding how the law of armed conflict applies to such extra-conflict acts as intercepting pirates and providing humanitarian relief to civilians in occupied territory.

The success of any operation depends on proper mobility and embarkation planning and execution, whether movement is by land, sea, or air. For units to rapidly deploy, commanders must ensure their units maintain the highest degree of embarkation readiness. Marine Corps Reference Publication (MCRP) 4-11.3G, Unit Embarkation Handbook, addresses the doctrine, techniques, and procedures for effectively managing a unit embarkation program and planning and executing mobility and embarkation operations. In the case of amphibious embarkation operations, a Marine expeditionary unit is used as an example throughout. The target audience for MCRP

4-11.3G is the noncommissioned officer (NCO) through captain in the mobility/embarkation military occupational specialty and other NCOs/officers assigned unit embarkation responsibilities. The guidance and relevant information herein provides commanders and their staffs an appreciation of the internal workings of a unit embarkation section and the critical role it plays in a successful unit deployment. This publication provides uniformity across the Marine Corps for integration into standing operating procedures. This publication cancels MCRP 3-31B, Amphibious Ships and Landing Craft Data Book, dated 29 August 2001 and supersedes MCRP 4-11.3G, Unit Embarkation Handbook, dated 10 December 2004.

Navy analysts are struggling to keep pace with the growing flood of data collected by intelligence, surveillance, and reconnaissance sensors. This challenge is sure to intensify as the Navy continues to field new and additional sensors. The authors explore options for solving the Navy's "big data" challenge, considering changes across four dimensions: people, tools and technology, data and data architectures, and demand and demand management.

This new handbook provides a comprehensive overview of the issues facing naval strategy and security in the twenty-first century. Featuring contributions from some of the world's premier researchers and practitioners in the field of naval strategy and security, this handbook covers naval security issues in diverse regions of the world, from the Indian Ocean and the Mediterranean to the Arctic and the piracy-prone waters off East Africa's coast. It outlines major policy challenges arising from competing claims, transnational organized crime and maritime terrorism, and details national and alliance reactions to these problems. While this volume provides detailed analyses on operational, judicial, and legislative consequences that contemporary maritime security threats pose, it also places a specific emphasis on naval strategy. With a public very much focused on the softer constabulary roles naval forces play (such as humanitarian assistance, disaster relief, naval diplomacy, maintenance of good order at sea), the overarching hard-power role of navies has been pushed into the background. In fact, navies and seapower have been notably absent from many recent academic discussions and deliberations of maritime security. This handbook provides a much-desired addition to the literature for researchers and analysts in the social sciences on the relationship between security policy and military means on, under, and from the sea. It comprehensively explains the state of naval security in this maritime century and the role of naval forces in it. This book will be of much interest to students of naval security and naval strategy, security studies and IR, as well as practitioners in the field.

Andy Hesterman's 25 years in the Marines span a huge range of world events and personal experiences. I found myself laughing, rooting for him, and shaking my head at the insanity of it all. A great book!" - Nathaniel Fick, NY Times best-selling author of ONE BULLET AWAY "From a recruit surviving boot camp to a Major flying combat helicopters and controlling F/A-18s in Iraq, Andy Hesterman shares the pride of the Corps and the pain of saying goodbye to your family for yet another deployment. With Radioman, you'll feel like you've put on the Marine cammies and marched alongside Hesty for over two decades of service to our country." - Dell Epperson, Captain, U.S. Navy (Retired) "Radioman is far more than the story of one man's 25-year journey through the modern Marine Corps - as fascinating as that story is. It is also an account of the extraordinary changes - technological, tactical, moral - that have utterly transformed the American military in that time. Both gripping and honest, Radioman is also told with a humor and humility that makes for an extremely pleasurable read." - "Scott Anderson, New York Times best-selling author of THE QUIET AMERICANS" From a Gulf War grunt to a full-fledged Marine Major in the wars in Iraq and Afghanistan, Andrew Hesterman saw it all. Radioman offers a highly personal and unfiltered view of the Marine Corps as it transitioned from the post-Vietnam analog Reagan era to the post-9/11 high-tech George W. Bush and Obama years. Radioman begins with Andy as a recruit at boot camp and the ensuing training that leads to formally becoming a Marine. After comm school and the reserves, Andy is called to active duty in 1991 for the Gulf War, where he experiences combat up close in Kuwait. The next personally, professionally, and politically tumultuous decade brings marriage (and divorce), flight school and helicopter missions in Kosovo, the shock of 9/11, another marriage, and children. Andy's journey culminates as an officer in Iraq, where he directs air support for the Marines in Fallujah. Co-authored by Robert Einaudi, a close friend of Hesterman's since high school, Radioman provides an honest and vivid military portrait of the Marine Corps and the modern US military seen through the experiences of one Marine.
