~~Car DiY. Strange as it may seem, the main jet~~
~~on a Holley carb is not what you should be~~
~~using to calibrate the WOT mixture delivered~~
~~to the engine. That job is the function of the~~
~~power valve and the PVRC. The main jet,~~
~~however, is the most often changed jet; the one~~
~~changed in an effort to optimize the mixture~~
~~for maximum power.~~

When it comes to calibration, Holley carburetors are base line jetted at sea level at 70 degrees F. A few specific carburetors require stagger jetting, but for the most part, the factory installed jets will be within a couple of numbers of being right. Fair enough. Keep in mind though, the density of air decreases when temperature increases.
