TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the

help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by

Anne Frank.” —USA Today  
DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

the hearts and minds of millions of readers. Set in Mississippi at the height of the Depression, this is the story of one family's struggle to maintain their integrity, pride, and independence in the face of racism and social injustice. And it is also Cassie's story—Cassie Logan, an independent girl who discovers over the course of an important year why having land of their own is so crucial to the Logan family, even as she learns to draw strength from her own sense of dignity and self-respect. \* "[A] vivid story.... Entirely through its own internal development, the novel shows the rich inner rewards of black pride, love, and independence."—Booklist, starred review  
Random House Value Publishing

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with

---

their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of

Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we

maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help

---

students understand--and apply--key concepts. Johnny Tremain Chronicle Books Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support.

It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening

Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and

---

regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance

the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for

Congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Timothy is on  
probation. It's a  
strange word—something  
that happens to other  
kids, to delinquents,  
not to kids like him.  
And yet, he is under  
house arrest for the  
next year. He must  
check in weekly with a  
probation officer and  
a therapist, and keep

---

a journal for an entire year. And mostly, he has to stay out of trouble. But when he must take drastic measures to help his struggling family, staying out of trouble proves more difficult than Timothy ever thought it would be. By turns touching and funny, and always original, *House Arrest* is a middlegrade novel in verse about one boy's path to redemption as he navigates life with a sick brother, a grieving mother, and

one tough probation officer.  
**House Arrest** McDougal Littel  
Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)  
Modern Biology, California Holt Rinehart & Winston  
The story begins in fictional St. Petersburg, Missouri (based on the particular town of

Hannibal, Missouri), on the shore of the Mississippi "forty to fifty years ago" (the novel having been published in 1884). Huckleberry "Huck" Finn (the protagonist and first-person narrator) and his friend, Thomas "Tom" Sawyer, have each inherit a substantial sum of cash as a results of their earlier adventures (detailed within the *Adventures of Tom Sawyer*).
